Many Prize Winners In School Festival

TWELVE SCHOOLS ENTERED, WITH 237 INDIVIDUAL ENTRIES.

The third annual School Festival of the Red Deer Inspectorate was brought to a successful conclusion on Wednesday evening with a Grand Concert held in the United Church.

Under the direction of the association officers, Inspector W. J. McLean, Principal C. M. Laverty and Mrs. M. L. Waters, secretary, the Festival was excellently managed and the day's program progressed smoothly and rapidly. Much credit is also due Alan Carter, Barr Gilmour and Donald Wilkes, whose efficient handling of stage equipment facilitated the accomplishment of the dramatizations. The executive especially wish to thank J. S. McCormick and Mrs. F. H. Reed for their untiring efforts in helping to make the festival such a success.

Owing to the very bad condition of the roads and the epidemic of measles and 'flu, a large number of entries were unable to appear on the program. Forty entries from Rocky Mountain House and large numbers from Delburne and several other schools were prevented from attending, which made the festival smaller than in previous years. However, about twelve schools were represented in 35 events, with 237 individual entries.

The adjudicators were: For music, Madam J. J. Duggan and W. J. Hendra, Edmonton; elocution, Mrs. E. W. Cormack, Alix, and for dramatization, Theodore Cohen, Edmonton. J. S. McCormick, of the School Board, presided at the Grand Concert and presented the winners with certificates. Inspector McLean spoke briefly, intimating that this would probably be his last year connected with School Festival and sport events. The 35 winners were featured at the evening concert and one extra dramatization from Lacombe, which lost by one point, and on a special request from Mr. Cohen was asked to be included. A Lacombe chorus, Miss French's group, heading the program, were awarded the first prize and also received a prize of $5.00 from the I.O.D.E. In the winners for recitations, Jack Simpson, Bernard Sheridan, Doris Danner and George Marshall received 100 per cent in 1935 and again this year. Ivy Wilson of Shady Nook, solo winner, was unable to remain for the evening and her place was taken by the second winner, Barbara May of Lacombe. Donald Wiltse, Lacombe, second, also appeared for Dick Noyes of Red Deer, first.

The list of prize winners follow:

Grade I.

Recitation: Jack Simpson, Lacombe. Solo: Dorothy Kroll, Pleasant Hill. Solo: Bobbie Laird, Lacombe.

Class A Dramatization (Grade I.): Miss R. Lockerby's Room, Lacombe.

Grade II.

Solo: Stanley Saunders, Lacombe.

Chigwell

DEATH OF GEORGE A. CHISWELL SHOCK TO DISTRICT.

CHIGWELL.—This district was greatly shocked to hear that George A. Chiswell passed away at the Lacombe Hospital from pneumonia on Monday, April 13, aged 37 years. The late Mr. Chiswell was a native son of the Lacombe district and farmed four miles east of the town. He is survived by his wife and two children, his mother, Mrs. J. Chiswell of Chigwell, two sisters and six brothers. Funeral services were held in St. Andrew's Church Wednesday afternoon, the Rev. R. B. Layton officiating, after which the remains were interred in the Lacombe cemetery. Much sympathy is extended to the family in their sudden bereavement.

Mrs. G. Hand left on Tuesday for the coast to visit her son Roy and her daughter, Mrs. Ed. Graham.

Miss Edna Norris arrived home on Thursday and spent the Easter holidays with her parents, Mr. and Mrs. O. Norris.

Mrs. George Lemon underwent a serious operation in Edmonton. Latest reports state she is regaining her strength slowly.

HOW TO ACHIEVE BARLEY OUTLET

An increased outlet for barley as feed may be achieved by an increase in the numbers of livestock fed on farms, by improving the market finish of certain animals, by reducing the volume of imported feeds, or by supplanting other feeds now commonly used. Barley is recognized as an excellent feed for many classes of livestock, and a preeminent feed for hogs, according to the report of the Special Barley Committee, submitted to the National Barley Committee at its annual meeting held recently in Toronto.

There is widespread support for an increase in hog numbers on a scale sufficient to absorb many additional millions of bushels of barley or other feed cereals, the report points out. The potential outlet for providing an improved finish on meat animals is greater than may be generally appreciated. It has been estimated that it would require between seven and eight million bushels of grain to produce a desirable finish on the annual supply of poultry alone that comes to the Canadian market. Only a small portion of this is being used. Corn is the only imported feed that competes directly with barley.

A TREASURE HUNT

"When your sweetie's father came to town, did he look you up?"

"Yes, in Dun and Bradstreet."

Social Credit Session Of Alberta Legislature

By W. M. DAVIDSON

A conscientious student could write a book based on the conduct of the Alberta legislators and the doings of the Government during the recent session, and even then not do complete justice to all that occurred. All persons must agree that the session differed widely from any previous session of the Alberta body, and also from any other legislature in any other province in Canada. Such a conclusion is not necessarily either critical or laudatory and I am repeating it to explain some of the troubles of the writer who attempts a summary in one brief article.

The most dramatic or sensational incident or episode was the breach between the Government and Major Douglas. The most alarming was the default on the bonds. The most immediately important was the budget shifts, with the new taxation. The most ridiculous—the biggest burlesque—was the counterfeit recall fiasco. One hundred and two acts were added to the statutes of the province—some important, some extreme, but many of lesser importance and of a mild, amending order.

Anyone who understood the Douglas theory and the attempted application of it by Mr. Aberhart was not surprised at the breach and the province should be relieved that it is all over. It would have been better for both men and for the province if the break had come two years before when the two men first met, because adaptable as each might be, they could not make their theories fit. They preach different doctrines. Mr. Aberhart may not have been aware of the discrepancy, but Major Douglas knew it and so informed the late Government before the election.

What must be most disappointing, particularly to the Social Credit supporters, is that no one now has even the beginning of a plan for the application of the theories of the province. I was under the impression from reading the Aberhart manual and other writings, that the present Premier had in a general way, a plan for Basic Dividends and such like, and all the Government desired of Major Douglas was to get the machinery under way, by fixing it up here and there. But that is not the case at all. The Government will now appoint a committee of experts to prepare the machinery. There are no experts, other than Douglasites, who are now unavailable, who have as much information about the Aberhart plan as Mr. Aberhart himself, and perhaps Mr. Manning. The Commission, apparently, from what Mr. Aberhart says, will start from the beginning and build from there.

The Commission, if capable and sincere, will discover that Social Credit may be applied and Basic Dividends paid when and not until such time as:

(1) Alberta has full, complete, national sovereignty,

(2) and is under some form of socialism or communism.

The Government made a businesslike effort to balance the budget by imposing new taxation which will not be onerous or difficult to

(Continued On Page Five)

Mrs. Edith Elliott Dies At Crossfield

The Clive district was shocked to hear of the death of Mrs. Edith Elliott from pneumonia at the home of Mrs. Cowley in Crossfield on April 9.

For the past ten years Mrs. Elliott has been a teacher in a private school at Crossfield and was much beloved by the children. She endeared herself to the whole community wherever she went and took a very active part in church activities. For some time she was superintendent of Inverlea United Sunday School and president of the Ladies' Aid. She held similar positions at other places.

Mrs. Elliott was born in Northallerton, Yorkshire, England, in 1876, came to Guelph, Ont., in 1880 and then to Lacombe in 1906, where she was married in 1907. She made her home in Lacombe until going to Crossfield, except for a few years in Edmonton.

She leaves to mourn her loss three children, Mrs. Harold Danser of Fortesburg, Mrs. Guy Randall of Lacombe, and one son, Hudson, at Cremona, also two sisters, Mrs. J. G. Elliott and Mrs. A. P. Rainforth of Clive, and one brother, L. B. Rainforth of Los Angeles, Cal.

Beautiful floral tributes were sent by numerous friends and relatives.

TO COMBAT MOSQUITO PESTS

The Dominion Entomologist directs attention to the fact that much can be done by community action in reducing the number of mosquitoes which affect the comfort and health of citizens generally. Mosquitoes breed largely in temporary bodies of water, such as snow and rain pools and river flooded areas. They develop only in water, and the method of control which ultimately gives most satisfaction consists in eliminating the breeding places by drainage or by filling, and, in the case of large flood areas, by dyking and pumping. Filling and levelling of low places where water accumulates should be carried out wherever possible. Care should also be taken to prevent mosquitoes breeding in artificial containers, such as water barrels, either by emptying or screening them.

The Dominion Entomological Branch has prepared a circular dealing with mosquito control in Canada. This circular is available free on application to the Publicity and Extension Branch of the Dominion Department of Agriculture at Ottawa. In the case of community campaigns, towns and villages contemplating action against these mosquito pests should write the Dominion entomologist at Ottawa for direction and information.

Around The Town

Attending the 50th anniversary on Wednesday, April 8, of the arrival of his father, the Rev. F. W. Locke, pioneer United Church pastor, to Calgary, Dr. F. Dean Locke, accompanied by Mrs. Locke, spent a few days in Calgary last week to celebrate the occasion.

* * *

Mrs. Tom Wilks returned from Olds on Tuesday, where she visited for several days, the guest of Mr. and Mrs. Jack Wilks.

* * *

The regular meeting of the Men's Club will be held on Tuesday night, April 21, in the Church Hall. A special program has been arranged, as it will be "Ladies' Night," when the wives and lady friends of members are invited.

* * *

A charmingly arranged tea was held on Saturday afternoon at the Adelphi Hotel, under the auspices of the Young Ladies' Guild of the Anglican Church. Mrs. P. C. Owen was convenor, her assistants being Mesdames Nelles, Kanngiesser, Burden, Misses Betty Hornby and Pat Lewis. The tables were attractive with centre decoration of Spring flowers. The sale of home cooking was in charge of Mrs. Therrault and Mrs. Henry Lewis.

* * *

W. S. French of Vancouver is visiting for a few days with his parents, Mr. and Mrs. Angus French.

* * *

F. M. Layton, H. Sellers and T. Judah were visitors to Edmonton during the Easter holidays.

* * *

Dick Robinson took advantage of the holiday and visited with his parents at Camrose.

Miss Violet Keena has arrived from Calgary, and taken charge of the hairdressing and beauty parlor at the Cosy Barber Shop.

* * *

Mr. James Kinley, Mr. William Riley and Mr. and Mrs. Ab Riley left for Vancouver and Port Kell, B.C. last Friday, for a two-weeks' visit.

* * *

Mr. Bert Newman is spending a few weeks holiday in Vancouver and Victoria.

* * *

Boyd Carruthers from Calgary and Ted Carruthers from Big Valley spent Easter week-end with their mother, Mrs. N. E. Carruthers.

* * *

Mr. and Mrs. R. Erin McAllister of Edmonton were guests of the latter's parents, Mr. and Mrs. W. N. Morrison, over Easter week-end.

* * *

Jessie Hay was a visitor in Calgary during the Easter holidays.

* * *

Bill Swanson returned on Monday from a business trip to Edmonton.

* * *

Dr. George D. Misener, son, and Dick Talbot, grandson, of Mrs. E. L. Misener are Edmonton Easter vacation visitors at her home.

* * *

Miss Margaret Masters returned on Saturday from an extended trip to California and Vancouver, B.C. While in Vancouver she was the guest of Mr. and Mrs. Frank Smith.

* * *

Mrs. J. H. W. Moore is holidaying at the Pacific Coast for a few weeks.

* * *

J. W. Clark and B. O. Godfrey spent last week-end in Calgary.

GREEK PRINCESS

PRINCESS EUGENIE

Here is a new photo of Princess Eugenie of Greece, cousin of the Duchess of Kent, who has been mentioned frequently as possible choice of King Edward VIII should Britain's king decide to marry. The princess lives in Paris.

Bruce MacMillan Reviews Work Of Legislature

CLAIMS PURCHASER'S TAX IS AIMED AT LUXURIES AND NOT ORDINARY FOODSTUFFS.

D. B. MacMillan, M.L.A., gave a general review of several of the bills passed by the first Social Credit legislature when he was enthusiastically welcomed by the regular meeting of S.C. Group No. 1, on Monday evening. First dealing how bills are dealt with by the legislature, Mr. MacMillan then proceeded to give specific account of some of the more important bills.

Referring to the increase in taxes, he stated that these are more apparent than real, due in part to the fact that there has been a new assessment on property during the last year. While the fuel oil tax is new, the cost to the consumer is very little greater, only the government gets the revenue instead of the oil company. The idea behind the increase in drivers' license fees is to eventually provide accident insurance included with the license for the fee paid, and to ultimately provide for examination of applicants —providing more safety on highways by eliminating unfit drivers.

Instead of taxing ordinary foodstuffs as claimed by many newspapers, the ultimate purchaser's tax is really almost a tax on luxuries owing to the long list of exemptions that are provided for. There is an increase in the income tax but over against that the wild land tax and the supplementary revenue tax have been abolished. Also the government is taking over the whole cost in some cases, and a greater portion in others, of the costs of many services now paid for in part by the municipalities.

A small decrease has been made in the grants to schools in the more prosperous districts, which has allowed for an increased allowance to schools in dried-out areas. Actually the estimates for education are increased by the amount of $50,000. The bill covering assistance to industries gave the government power to assist in the promotion of productive industries in the province. Health and relief bills were also touched upon. The Social Credit bill, while containing no definite information, gave the government the power to take necessary action. Some of the Douglas-Aberhart correspondence was read and commented upon, the expressed feeling of the speaker being that the government was being made a laughing stock by the actions of Major Douglas, who in many instances was giving his cables to the press even before sending them to the government. Mr. MacMillan believes that before dividends can be paid the province as a whole must be showing a profit instead of a loss. He, however, will insist that dividends be paid to indigent cases this Fall if found at all possible, in order to get away from relief.

The question forum was held following the address, in which Mr. MacMillan answered queries concerning the Refunding Scheme, the Codes, the Provincial Bank, the Stabilization Act, etc. The speaker stated that as soon as the bills are printed he would be able to enter into fuller details with regard to their contents.

A hearty vote of thanks was extended to Mr. MacMillan. The chairman, T. F. Roberts, cordially invited all present to meet with the group at their regular meeting on the second Monday of each month.

NEEDN'T WORRY

The manager of a cinema was interviewing an applicant for the position of attendant. After asking the man several questions as to his suitability for the job, he finally demanded: "What would you do in case of fire?"

"Oh," said the man, "don't worry about me, I'd soon get out."

THE CAUSE

Mother: "Why are you making faces at that bulldog?"

Small Child (wailing): "He started it."

CANADIAN LEGION SPONSORS WELL ATTENDED DINNER

NINETEENTH ANNIVERSARY OF BATTLE OF VIMY RIDGE CELEBRATED IN FITTING MANNER.

In commemoration of the nineteenth anniversary of the Battle for Vimy Ridge, over one hundred guests attended the dinner in the Church Hall, sponsored by the Lacombe Branch of the Canadian Legion.

At the call of the bugler, the guests sat down to a dinner prepared and served by members of Alexandra Chapter, Order of Eastern Star, which was thoroughly enjoyed.

Chairman Stan Puffer called upon Comrade Anderson to propose the toast to the King, which was responded to by Comrade Marble, who also paid tribute to the late sovereign, King George V.

The toast to the Legion was responded to by W. F. Puffer.

Musical selections were rendered throughout the program by Mrs. Waters at the piano and Miss Watt, violin.

Comrade Puffer then introduced the guest speaker, Col. W. B. McLeod, who gave an interesting description of some of the phases of the Great War, and throughout his talk maintained a high note of imperialism.

Mr. and Mrs. T. Wilks delighted the gathering with songs, and Reg. Wilks entertained with humorous selections on the piano and mouth organ.

ANOTHER OLD-TIMER CALLED BY DEATH

JAMES WRIGHT, RESIDENT OF LACOMBE FOR 36 YEARS, PASSES AWAY.

James Wright, well-known resident of Lacombe, passed away Monday, aged 66 years.

Thirty-six years ago, Mr. Wright and his wife left their home in St. Mary's, Ont., and came west to settle in Lacombe. He was married twice: his first wife predeceased him in 1914, and the second wife in September, 1935.

He leaves three daughters and two sons, Susie, of Toronto; Mrs. Uhlig, Rush City, Minn.; Mrs. E. T. Bailey, Lacombe; Harry and William of Lacombe. Two sisters and one brother survive: Mrs. G. Pearce, Toronto; Mrs. D. Miller, Galt, Ont., and Charles Wright, of St. Mary's, Ont.

Funeral services were held Thursday at 2:30 p.m. in the Baptist Church, at which the Rev. Hollings-worth of Calgary and Rev. Waterman officiated.

Burial took place in the Lacombe cemetery.

The World of Fact and Fiction

By "ART"

Something new in the history of the Great War has just been published in "The Who Was Who in the War," by Robert Bruckner, of which I have just read the condensed version. It tells of an incident wherein the commander of a British destroyer landed on the Belgian coast and by a clever scheme helped the Belgian troops slow up the German troops in their first big "push." It's a story which you will find hard to believe, yet the author has verified all the details through British and Belgian official sources. Then again, the importance of the incident seems over-estimated.

"England Speaks," a panorama of the English scene in 1935, by Phillip Gibbs, is now in Lacombe's Public Library. It is a series of interviews with up-and-ups, down-and-outs and all classes of the English people. Have not read this book but it promises to be a very good one.

Much interest has centered in the the last few years on the Galapagos Islands, brought on mainly by a series of tragedies among a group of German colonists (one of them an heiress) who had settled on one of the islands. The Galapagos Islands are 600 miles west of Ecuador, in the Pacific Ocean. They were visited by Charles Darwin in the early years of his experimentation and he refers to them in his books on evolution. Here are found the elephant tortoise and a specimen of large lizard not found elsewhere in the world and many rare fauna and flora also exist only on these remote islands, around which an atmosphere of mystery has clung for many years.

Most important island of the group is Albemarle, which is sixty miles long and fifteen miles across, rising 4700 feet above sea level. There are 13 islands altogether, being the property of the Republic of Ecuador, which uses some of them as penal settlements.

Those who have enjoyed the novels of Mazo de la Roche will be pleased to hear that she has completed the sixth in her "Jalna" series, entitled "White Oak Harvest." It should be on the book counters in September.

REVIEW OF EIGHTH ALBERTA LEGISLATURE

FAR REACHING LEGISLATION PLACED ON STATUTE BOOKS; MEMBERS DRAW INDEMNITIES AND LEAVE FOR HOME; FIVE-YEAR ROAD PROGRAM IS PLANNED.

By T. B. WINDROSS

EDMONTON.—The first session of Alberta's eighth Legislature prorogued during the past week after nine weeks of strenuous work and after placing on the statute books of the province 108 new laws and amendments to present acts.

Following the end of the session the Social Credit members held a three or four-session caucus, during which a summary of the legislation was considered before the members left for home. It was stated all the Crediter members are on call for another caucus in case one is needed. Before leaving for home, the members of the legislature in all parties drew their indemnities of $1,000 each, amounting in the aggregate to nearly $114,000.

During the present week both Premier Aberhart and Hon. E. C. Manning will go to Vancouver, the former for a two weeks' holiday and the latter on his honeymoon. Mr. Manning's wedding day was Wednesday.

During the early part of the week, D. M. Duggan, Conservative leader predicted a break in the Social Credit ranks at no far distant date. He said it was obvious during the latter days of the session that a leftist and rightist division was developing in the government party. It became more evident each day that various members were thinking for themselves more and more on questions of legislation.

It did seem at times, when legislation that had not been caucused was before the House, that some of the government supporters had views more independent than is usual with a political party in power. But how far the predictions of Mr. Duggan may be true it is not clear. Premier Aberhart himself denied there was anything like left and right wings to the Social Credit party in the legislature.

Exemption of 15-cent single or aggregate purchases from the two per cent ultimate purchasers' sales tax was given by the legislature

(Continued On Page Four)

Clive

CLIVE.—The fine weather of the past week reminds us that Spring might be just around the corner.

James Tees and L. E. Bell made a trip to Calgary last week with cattle and report good sales.

About one hundred head of fat cattle were shipped from here last Tuesday.

Miss Dorothea Allison, who is teaching school west of Carstairs, is spending her vacation with her parents, Mr. and Mrs. W. E. Allison.

C. E. Gardner and family have moved to Clive from the farm north of Tees and have taken up residence in the Kocher house.

The Women's Association met at the home of Mrs. Milton Coote on Thursday, April 9.

Leo Bell, Jr., of Stettler, is home for the Easter holidays.

Mr. and Mrs. Kenneth McLeod and children of Sylvan Lake are visiting relatives here at present.

The Clive skating rink had a fairly successful season the past winter.

CALGARY ARTISTS ASSIST PROGRAM

Special Easter music was given by St. Andrew's United Church choir at the evening service on Sunday, April 12. Assisting the choir were the Misses Margaret, Rose and Ivy England of Calgary, who also sang two trio selections which were greatly enjoyed. Their brother, George England, was a most capable organist, and the choir concluded the service with part of the Hallelujah chorus.

Choir members and their friends gathered at the home of Mr. and Mrs. D. Cameron following the church service, where refreshments were served and a delightful sing-song enjoyed. Very amusing readings were also given by Mr. Cameron Fraser, which were heartily encored.

Old Time Fiddlers' Contest

Under the auspices of the Vestry of St. Cyprian's Church, the Old-Time Fiddlers' Contest, which carried with it the championship of Central Alberta, was staged at the Spruceville Hall on Monday, April 13, and in spite of the inclement weather and the roads, which were in a deplorable condition, seven of the eleven entrants came prepared to carry off the championship, one of them walking from Morningside to compete.

The contestants each gave of their best and it was a difficult task for the judge to decide to whom the audience gave the greatest volume of applause. However, on another hand-clapping vote, three fiddlers were given an equal amount of support over and above the other competitors, and it was necessary for each of them to play another piece, much to the pleasure and excitement of the large audience, who were quite worked up over the close contest developing. The vote this time rested between J. N. B. McDonald, Cameron Fraser of Lacombe and Roy Flegal of Morningside.

Finally, the decision gave Roy Flegal the championship and first prize, Cameron Fraser took second prize, with J. N. B. McDonald a very close third. The other contestants were: Dave Holloway of Morningside, W. H. Clarke, Frank Rowland and Oliver Winslow, all of Lacombe, who each played excellently.

The chairman announced that next year a cup will be put up for competition, with suitable prizes for the respective winners.

Immediately after the contest the floor was given over to Mr. Kasha, who in a very admirable manner carried out the duties of M.C. for the dance. At midnight the ladies of the Anglican Y.P.A. served a first-class lunch. Dancing continued until the "wee sma" hours, to the strains of Hughes' orchestra.

Altogether it was one great success for everyone concerned and the thanks of the Vestry of St. Cyprian's are extended to all who so ably assisted in making it so.

ITALIAN GOVERNMENT TAKES OVER WHEAT

The Italian government has commandeered all stocks of wheat in Italy. It is reported that Italy has enough wheat to carry through until next harvest but Broomhall thinks wheat will have to be imported.

TO BEGIN WITH

"Young man, I wish you would cut down on your college expenses."

"What about dispensing with my books?"

Rimbey

RIMBEY, April 14.—In spite of almost impassable roads, approximately 600 people came into Rimbey on last Wednesday to attend the annual community sale sponsored by Rimbey Agricultural society.

Dozens of picnic lunches in farm wagons and sleighs reminded one of an old time summer picnic. Prices at the sale were fair. Top price paid for a horse was $80. C. F. Damron, who auctioned the sale, began his labors at 11:00 a.m. and finished at supper time. Stores and all other businesses in Rimbey had a record day.

Spruceville

SPRUCEVILLE.—Mrs. Boden was taken seriously ill last week and is in hospital. Some improvement in his condition is reported.

The Juniors held a very successful meeting Saturday night at Mrs. G. T. Young's. They started to study Beverly Nichol's "Cry Havoc" and are enjoying it.

Rosalie Southward has been very ill but is improving.

MIRACLE PLAY AT ST. CYPRIAN'S CHURCH

What promises to be a production of unusual interest is the Easter play, "God So Loved the World," which will be presented by St. Cyprian's Girls' Branch of the W.A. on April 22, 8:15 p.m., in the Church. Programs at 25c each, which also will serve as admittance, may be obtained from any branch member. a16c

QUICKLY FREES PIPES
from clogging matter

Use Gillett's Pure Flake Lye regularly and you'll keep sink drains, tubs and toilets running freely. Each week pour it down full strength—it will not harm enamel or plumbing. Kills germs and destroys odors as it cleans. Gillett's Lye eases up dozens of heavy cleaning tasks — saves you tiresome work. Keep a tin on hand!

●Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet shows you practical ways to lighten many household chores with this powerful cleanser and disinfectant . . . tells also, how to use Gillett's Lye for thorough cleaning in and around farm buildings . . . gives complete instructions for making fine-quality soap at home. Write for a *free* copy to Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Catering To Women Fans

English Football Manager Thinks They Are Good Supporters

Women are being sought out as supporters of football in England and their whims are being considered by team managers. G. F. Allison, manager of the Arsenal Football Club, of London, is earning the title of "Feminine Football Fans' Fairest Friend." At the Arsenal grounds, have been opened special waiting rooms equipped with all the latest in beauty aids, and a restaurant, with light decorations and comfortable basket chairs in green, where tea or dinner may be enjoyed from dainty chinaware. "Many of our season ticket holders are women," said Allison, "we like to have them, they're good for the game, so we look after them."

If clear glass milk bottles stand in the sun, the milk soon develops a definite tallow-like flavor.

A revised definition of the three R's—Romance at 25; Rent at 45; and Rheumatism at 65.

Classes in skiing are now being held at Nice, France.

Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, scales, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss —no muss. Clear, greaseless and stainless —dries up almost immediately. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, will prove it—or money back. D. D. D. Prescription is made by the owners of Italian Balm.

WORLD HAPPENINGS BRIEFLY TOLD

Daylight saving will be in effect in Toronto and Montreal from April 26 until Sept. 27, city councils decided.

The Franco-Canadian treaty of navigation signed at Ottawa, December, 1933, has been ratified by the senate.

European wheat production will fall below last year, it was forecast by the Institute of International Agriculture in a report showing a general drop in winter crops.

The Australian government has decided to erect a group of bronze statuary in front of the parliament buildings at Canberra as a memorial to King George V.

Traffic returned to normal in London after a one day strike of 1,000 taxi, bus and street car drivers as a protest against orders shortening their lunch hours.

The Donnelly resolution to provide pensions for the blind passed in the House of Commons but Finance Minister Dunning held out no hope that pensions would be paid this year.

Total ordinary revenue of the Dominion government for the month of February was reported in the Canada Gazette at $23,023,052 compared with $23,292,909 in Feb., 1935, a decrease of $269,856.

The 1936 British Mount Everest expedition, led by 51-year-old Hugh Ruttledge, left Darjeeling, India, in an attempt to conquer the world's highest mountain with the blessing of Buddhist Lamas.

Fingerprints of all persons obtaining permits to carry revolvers will be taken and kept on file by provincial police, it was announced by Lieut.-Col. L. Lambert, chief of the Quebec division.

Snappy Clothes For Navy

British Admiralty Has Announced Some Radical Changes

Britain's navy is going all dinky. Not satisfied with attractive white shoes and new ties, in addition to the option of cocoa or chocolate instead of rum, Jolly Jack is now to be issued with a sports shirt of the most charming blue rayon.

And this is not all. Pajamas in attractive colors are to be offered in the canteens at $2.50 a pair, made of the best artificial silk. For an extra quarter, the initials of the wearer can be obtained, also in silk, to be sewn on the pocket of the pajamas.

Gone also are the official canvas kit bags and henceforth Jack will be issued with a smart imitation leather suit case.

When ashore, Jack may, if he wishes, discard his bell bottom pants for a smart new rig of navy serge, with white collar and black tie.

These innovations have just been announced from the Admiralty in a document to commanders of the fleet who are asked to co-operate in every possible way in "helping seamen to adapt themselves to new and more attractive clothing."

What Jack will have to say about these silk pajamas if he happens to be suddenly called from his bunk for extra duty on a stormy night in the North Sea remains to be heard, but will hardly be publishable.

Imports Not Heavy

Canada Manufactures Ninety-Two Per Cent. Of Soap Used

The cost to Canada is more than $9,000,000 a year to keep moderately clean and the women of the country pay two-thirds of that amount for ordinary household or laundry soap, soap flakes, chips and powdered soap, according to information received from the department of trade and commerce in Ottawa. The remainder of the amount is paid out for toilet and castile soap of which nearly two and a half pounds are used annually for every man, woman and child in the country.

Ninety-two per cent. of the soap that hides ingeniously in bath water, that slips out of the soap dish, that is rubbed behind Johnny's ears and smarts in father's eye when he shaves, is made in the Dominion, while local manufacturers contribute an even greater percentage of the huge bars that melt in the dishwater or disappear in the washing machine.

The United States is Canada's best customer for soap while it at the same time supplies Canada with most of its soap imports. Exports to the United States last year totalled $594,926 while imports amounted to $344,980.

Irish Might Object

The Woodstock, Ont., Sentinel-Review, says: Using the word England when Britain is meant always brings a protest, and a Scotsman writing to a contemporary suggests a solution: "Let Scotland contribute the first four letters of her name and England the last four. This might solve the difficulty and make a lot of people happy." On the other hand, it would be sure to arouse the "Ire" of another country.

North America is the only continent with rich coal reserves far inland from the coast. 2142

Sea Hero Of Britain

Death Removes Former Admiral Of British Fleet

The recent death of Earl Beatty removed a notable figure in matters dealing with Empire defence.

David Beatty—later to be known as Earl Beatty, Viscount Borodale and Baron Beatty of the North Sea and of Brooksby (county Leicester)—was born Jan. 17, 1871, and was the second son of David Longfield Beatty of Borodale, County Wexford.

He entered the navy as a cadet on the famous training ship Britannia in 1884, when he was only 13, and in 1892 became lieutenant. In most of Britain's "little wars" of that period he played a worthy part.

He commanded one of the flotillas of gunboats which accompanied Lord Kitchener's advance up the Nile in the Sudan campaign of 1896-8. His gallantry and good leadership earned him the rank of commander and the D.S.O. Two years later he was in the Barfleur on the China station when the Boxer rising took place. He was twice wounded in leading a successful attack on two Chinese batteries when the British naval forces made their first efforts to relieve the besieged legations in Peking (now Peiping). At 29, when most officers consider themselves fortunate if they have obtained commander's rank, he was captain. A long break then occurred in his active service record.

In May, 1901, he married Ethel, daughter of Marshal Field, of Chicago, and was no longer dependent upon his profession. In the navy it was believed that having been promoted rear-admiral before he was 40 he would not be employed as a flag officer. Winston Churchill went to the admiralty in 1911, however, and his estimate of Beatty's qualities led him to secure Beatty as his naval secretary.

In 1913 Beatty was given command of the first battle cruiser squadron, that new combination of high speed with tremendous hitting power of which so much was expected in the event of war. In 1914, therefore, at the outbreak of hostilities Beatty was occupying a position second only to that of the commander-in-chief of the Grand Fleet.

Before the war was a month old he made his dashing and successful operation into the Heligoland Bight, where he sank three cruisers and one destroyer, his own squadron suffering no loss. In January, 1915, there was the terrific action of the Dogger Bank in which, it is true, the British forces paid heavy toll, but which nevertheless put an end to German "cut and run" raids on English coastal towns. In that year Beatty was made vice-admiral.

His fame reached its highest peak in the first phase of the battle of Jutland. Over this fight controversy has raged ever since and is certain to continue. Of Beatty it may be said without question that it was at Jutland he reached the height of his fame in popular estimation. Everybody's imagination was fired at the manner in which Beatty, after his advanced squadron had suffered shattering loss, continued to fight on in the determination to lead the enemy within the reach of the guns of the Grand Fleet. The escape of von Scheer from the trap laid for him will furnish a topic of high argument for years to come, but Beatty's reputation is secure for all time.

At the end of 1916 Beatty succeeded Lord Jellicoe as commander-in-chief of the Grand Fleet and on Nov. 16, 1918, at Scapa Flow in the Orkneys he received from Rear-Admiral Hugo von Murer the surrender of the German fleet, issuing the historic order that the German flags should be "hauled down at sunset and not hoisted again."

Beatty was elevated to the peerage in 1919 as Earl Beatty of the North Sea and of Brooksby and Viscount Borodale of Wexford. In the same year he was made an Admiral of the Fleet. Parliament expressed to him the thanks of the nation for his services and voted him a grant of £100,000. In the same year, too, he hauled down his flag as Commander-in-Chief, and in November went to the admiralty as first sea lord. For two years he was mainly occupied in reducing the navy to a peace footing. Further cuts were made from 1922 onwards, as a result of the Washington conference at which Beatty represented Great Britain.

Having crossed the Atlantic to attend this naval limitation conference, he took occasion to visit Canada. His tour took him to Ottawa, Montreal and Toronto, where he received enthusiastic public greetings.

He spoke favorably in Ottawa in November, 1921, to the Canadian Club of the Washington conference, which was then proceeding.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your *doctor* what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated *among the fastest methods yet discovered* for the relief of headaches and all common pains . . . and *safe* for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

"ASPIRIN"

Made Sub-Stratosphere Flight

Moscow Scientists Seek Information As To Sky's Light

The safe landing of a sub-stratosphere balloon which carried two Soviet scientists on a flight to determine whether the sky has its own light, independent of the sun, was reported in despatches from the Vladimir district of Moscow province.

The scientists, who claimed to have reached an altitude of 10,000 metres (about 32,808 feet), were I. A. Khvostikoff, of the Soviet Academy of Sciences, and B. I. Romanoff, of the state optical institute. They obtained 15 spectograms.

Amused The Farmers

A story in the London News-Chronicle says in a flight of rhetoric Randolph Churchill referred to a heifer as a "little brother." His audience of farmers in Dingwall market place rocked with laughter. It was not until it was explained to Mr. Churchill that a heifer could only be a "little sister" that he appreciated the "joke."

For Kiddies—Cotton-and Crochet

Household Arts by Alice Brooks

The Thing for Warm Weather Dress-Up

PATTERN 5554

Lacy—airy—healthy, best describes this open mesh frock for little girls who like to play in the sunshine. You can easily crochet this simple style in colored string, for the body's entirely of a simple stitch, with contrasting yoke of the same stitch worked more closely. Isn't the finished result irresistible?

In pattern 5554 you will find directions for making the dress shown in sizes 4, 6 and 8 (all given in one pattern); illustrations of it and of all stitches used; material requirements.

To obtain this pattern, send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

New Fruit Perfected

Lemor Has Combined Flavor Of Orange And Lemon

Instead of mixing orange and lemon juice for drinks in the future, it may be possible to squeeze an orange-lemon blend of a single fruit if trees perfected in California by a Chula Vista rancher are adopted commercially.

James M. Ater, nicknamed the "Chula Vista Burbank" for his numerous experiments in plant breeding, has perfected what he calls a "lemor", which he says combines the flavor of the orange and the lemon into a delicious blend.

Ater has gone to the unusual length of patenting his new fruit, and is now considering crossing it with the lime to produce a still more complex product.

Explaining his method, Ater said he obtained wild orange trees and budded them with lemons.

Taking a cue from certain industrial machinery manufacturers, Ater plans to lease his trees rather than sell them if they prove feasible commercially, and collect a royalty as well.

The new fruit is superior to either the orange or the lemon in keeping properties, Ater said, and will remain in good condition 18 months after being picked.

No Candy For Quints

Probably Will Have Ice Cream At Birthday Party

Interviewed during his visit in New York about his charges and their future, Dr. Allan Roy Dafoe, physician to the Dionne quintuplets, said:

"None of them has yet tasted ice cream or candy. We'll probably give them their first taste of ice cream at their birthday party in May. Their normal diet includes spinach, soup, orange juice and all the other things which a mother feeds a normal baby. We do not have much trouble with them. Marie, the youngest, is a little impatient, perhaps. But we are teaching them to depend on themselves and on each other. They form a little combine together."

Their mental development is normal, and they are leading happy lives. They can say "bonjour and au'voir," for so far they are learning to talk only in French, the family tongue, the doctor said. "I hope that they will be able to meet and mix with their brothers and sisters before they are three or four years old."

Pottery Clays In Canada

Fireclay Deposits Found In All But Two Provinces

Pottery clays are not widely distributed in Canada, states the Department of Mines, but there are a number of deposits of importance, particularly of china clay, in Quebec and British Columbia; of ball clay, used in the compounding of porcelain, in Saskatchewan; and of stoneware and earthenware clays in Nova Scotia, Saskatchewan and Alberta. With the exception of Prince Edward Island, and Manitoba, all the provinces of Canada are known to possess deposits of fireclay. Sewer pipe clays occur in Nova Scotia, New Brunswick, Ontario, Saskatchewan, Alberta and British Columbia.

"Aspirin" Trade Mark Sustained

A warning is found in the judgment just given by the Exchequer Court of Canada at Ottawa, in an action brought by The Bayer Company, Limited, owner of the trade mark "Aspirin". The action asked a judgment of the court restraining the defendant from infringing the trade mark by selling tablets as "Aspirin" which were not the product of The Bayer Company. The judgment restrains the defendant permanently from putting out any of his own tablets as "Aspirin" or under any name so similar to "Aspirin" as to be confusing and awards The Bayer Company damages and costs.

"It says the man was shot by his wife at close range."

"Then there must have been powder marks on the body."

"Yes; that's why she shot him.'

Judge: "And why do you think I should be lenient with you?"

Defendant: "It's my lawyer's first case."

$500.00 IN PRIZES
For Telling What the Other Needle Said

If you haven't entered this contest, your chances are still good—272 times as good! What *would* the other needle say about the threads everybody depends upon for firm, smooth, even strength, no matter how fine in size—Coats' and Clark's 6 cord Spool Cotton? Get an entry blank from your favourite store and write on it what you think the other needle would say. It's easy—but hurry—YOU may WIN!

The 5 Standards of Excellence

1. In COATS' and CLARK'S 6 CORD SPOOL COTTON, 6 Cord Cable Construction makes every thread, however fine, firm and dependable.
2. Strength that holds seams secure through years of use and laundering. There is no starchy coating to give only temporary strength which vanishes in washing.
3. Smoothness to withstand friction of machine and hand sewing.
4. Elasticity to provide seams that will not break or pucker.
5. Evenness which permits easy, rapid movement through the eye of the needle under tension.

New York Enjoyed Exhibits

Canada's Outdoors Taken To National Sportsman's Show

Mid-town New Yorkers, used to the fumes of gasoline exhaust, and traditionally aghast whenever they realize pure air is about, paused recently amid the fragrant odor of cedar and balsam in the Grand Central zone.

Canada and the great outdoors had come to New York and settled in Grand Central Palace where, at the national sportsman's show, the nostalgic, or merely curious, wandered in replicas of Nova Scotia or Maine forests.

Every day fly casting, log rolling, canoe tilting and other sports of the outdoors vied with taxi dodging, subway swaying and other pastimes of the Gothamite.

A tank occupying 2,800 square feet of floor space accommodated the casters and rollers. Presiding over the sports was Needahbeh, full-blooded Penobscot Indian from Oldtown, Me.

Canadian provinces had exhibits of animals ranging from three inch chipmunks to 1,800 pound moose.

All Parties Represented

Committee Chosen To Study Elections Act And Amendments

Justice Minister Lapointe has announced the personnel of a special committee of the House of Commons to study the Dominions Elections Act of 1934 and amendments.

All parties are represented on the committee which comprises 22 Liberals, five Conservatives, one C.C.F., one Social Creditor and the one member of the Reconstruction party.

New Boarder — This is excellent hash. What's your recipe for making it?

Landlady—I have no recipe. It just accumulates.

From two to five million individuals in the United States have organic heart disease.

The inscription on the American Liberty Bell may also be found in Leviticus 25:10 in the Bible.

Northern Sea Route

Booklet Gives Information About Shipments Via Hudson Bay

The port of Churchill and the possibilities of western Canada's most direct sea route to Europe are dealt with in a booklet by the Saskatchewan Co-operative Wheat Producers, Limited, Regina.

In dealing with the Hudson Bay route it is pointed out that in the distance to Liverpool, the land haul is shorter to Churchill than to the head of the lakes from most parts right across the northern part of Saskatchewan. It is stated at present there is a freight differential for export grain in favor of Churchill on C.N.R. lines ranging from one to four cents per 100 pounds at more than 300 points in the province of Saskatchewan. In addition approximately 70 points have an equal rate as between Churchill and Fort William.

In western Saskatchewan the favorable freight rate extends as far south as the South Saskatchewan river.

The booklet is profusely illustrated and deals with the Hudson Bay route from various angles, including a history of the development of the port of Churchill.—Winnipeg Free Press.

A transparent drain pipe is a new idea to help plumbers locate obstructions or lost jewelry.

Ireland, New Zealand and Hawaii are the three snakeless isles of the world.

Science Graduates Lucky

Electrical Engineers Have Least Difficulty In Securing Jobs

Prospects are good that all 176 members of the graduating class in the Faculty of Applied Sciences at the University of Toronto will find positions this spring, Brig.-Gen. C. H. Mitchell, dean of the faculty, said.

Employment was found for last year's class of 160 with little difficulty. Electrical engineers are most in demand, followed by mechanical, mining and metallurgical engineers, with chemical engineers last.

Prefers Prairie Potatoes

E. E. Perley, Conservative house member for Qu'Appelle, doesn't thing much of eastern potatoes. He told the House of Commons he hadn't eaten a decent potato since leaving the west and next year would advise western members to bring their own potatoes to Ottawa and have a real feast.

In the heyday of the Volga river in Russia, 25,000 barges plied the river.

Gold was found in a meteorite which fell in New Mexico several years ago.

MINARD'S
"KING OF PAIN"
LINIMENT

FLEMING'S FOLLY

— BY —

LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Soak Torney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Fleming's plan was concerned was only a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Helen and Link ride to Rawhide for supplies and to obtain funds to carry out the dam project. They meet Roper, who greets Helen and offers to shop with her. Link goes to see the Sheriff, who tells him Buzz Hamilton has been paroled, and would arrive on the incoming stage, but that he thinks Link has made a mistake in getting Buzz released.

(Now Go On With The Story)

CHAPTER IX.—Continued

"No, you bet not. Me and Marty Bush swore off a couple of years ago."

Slowly she wheeled her pinto. "I thought perhaps you meant to try to win money to help us out. Because we are still in danger of being unable to finish the dam, aren't we?"

Link avoided her look as he shrugged his shoulders. "Some. But playin' to win means you're sure to lose. No, Helen, I'm stayin' to fix a treat that'll sure tickle you. Nope, can't tell you now. Wait an hour or two. So long!"

He stood in the thick dust watching her ride away. Then with a look of fondness, the source of which was considerably deeper than casual friendship, he started for the spot where Sheriff Stephen stood waiting.

"Buzz came on the stage while yuh were in the bank," the official notified. "I tried to stall but Jackpot Meil an' Kilgo came along an' made a fuss over Buzz an' insisted he have a drink with 'em. The hull gang is in the Half Moon now."

Furrows grooved Flemings dark forehead as he surveyed the two-story false front of the saloon. "Doggone it," he exclaimed irritably, "those hombres don't care what they do to a youngster. Of course, Buzz is only two years younger'n me—he's twenty-one. But he seems like a kid, Sheriff, that's got to be watched all the time. This'll be a fine start for a chap just paroled from prison!"

"Helen's dont know he's here?"

Link shook his head. "I sent her on home. Now," he said reluctantly, starting away, "I've got to separate Buzz from them vultures and get him out to the Triple H. Ames, it might be better if you didn't come, on account of Buzz prob'ly saw all the lawmen at prison he cares to see for quite a spell."

"I'll let 'im alone so long's he don't go have another shootin' match. Tell Buzz I said so." And the lank officer moved off.

Through a friend at the state capitol Link had managed to have Buzz paroled after serving six months of the three year sentence. Fleming had gone to this trouble merely to please Helen, for with a sister's fondness for an errant brother, she was unusually attached to Buzz. So much so, in fact, that she never thought of him as a criminal and a weakling, but as a youth who had been unfortunate in his choice of companions. It was Helen's ambition, Link knew, to see Buzz make a man of himself so that she could one day yield him the Triple H to manage again, or divide their spread and surrender his share.

Moodily reviewing these facts, he strode inside the Half Moon. As the swinging doors flapped behind him several loafers glanced up with idle interest. Recognizing him, they exchanged significant looks and their eyes strayed to a large wall table where five men sat playing cards.

With something of a shock he identified the ex-convict for whose actions he was now responsible. Grey prison pallor had dissipated his former healthy tan and Buzz Hamilton's thin face was lined beyond his years. A furtive, hangdog expression persisted on his features and he had lost weight until he was almost scrawny. Loose, ill-made prison clothes hung in wrinkles about his sparsely fleshed body. The newcomer's whole appearance was little less than shocking.

Fleming's eyes caught those of the ex-convict and he forced a welcoming smile as he strode the few paces to the table. "Howdy, Buzz! Glad you're back. Say, you're looking good," he lied glibly. "Helen'll shore be glad—reckon there's nothin' she's wanted more than to have your help on that old Triple H spread!"

The other's gaze fell. "I s'pose yuh are glad to see me. Got things fixed to suit yourself, Fleming, so why shouldn't yuh be?"

Utterly taken back by this reply, Link frowned. "What do you mean, Buzz? 'Course I'm glad to see you! Best part is," he chuckled, striving to win enthusiasm from those lackluster eyes, "Helen doesn't know a thing about it. She'll be tickled when you ride up! Shall we start now?" he suggested.

Home Of The Future

University Professor Sees It As Vacuum Bottle Type

A house built on the vacuum bottle principle may be the forerunner, a Northeastern University professor said, of the air conditioned home of the future.

Its walls are 14 inches thick, its windows never open and its heating system functions without registers or radiators.

Frederick Stearns, assistant professor of mechanical engineering at Boston University, has had it under observation for a year. During that time, he said, because of the automatic air conditioning system built into the dwelling, inside temperature and humidity have remained practically constant regardless of outside conditions.

Thousands Of Mail Contracts

Postmaster-General Elliott told the House of Commons 12,952 contracts for transportation of mail are in operation in Canada at present. The number in provinces included: Saskatchewan, 1,433; Alberta, 1,104; British Columbia, 802; Yukon, 14.

—Haile Selassie, according to the news dispatches, goes without his regular meals one day a week. One would think that a queen would belong to more than one bridge club.

Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Help Build Resistance to Colds
Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds
At the first warning nasal irritation, sniffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat — where most colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner
If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks VapoRub. VapoRub acts two ways at once: (1) By stimualtion through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Va-tro-nol and Vicks VapoRub.

Canada And Defence

Dominion Has Made No Commitments, House Of Commons Is Told

Canada has made no commitments whatever with regard to empire defence or any other military activities, Prime Minister Mackenzie King told the House of Commons in answer to a question from J. S. Woodsworth (C.C.F., Winnipeg North Centre).

Mr. King said he received from Hon. Vincent Massey, high commissioner in London, the text of the statement made in the British House of Commons by Rt. Hon. J. H. Thomas, secretary for the colonies. Mr. Thomas dealt with the conference of Dominion premiers in London last May and the position of the Dominions in the league.

Defence matters had been discussed when the premiers were in London for King George's jubilee. With respect to that, former Prime Minister Bennett had said no undertakings had been asked or given. Mr. King said he could say the same thing about communications passed between the governments of Canada and the United Kingdom since the Liberals came into office.

It should be understood, said Mr. King, that Canada as a member of the league took responsibility only for those steps which had been taken by Canada on its own behalf.

Liberty Worth Preserving

Message Of King Edward To House Of Commons

Under a constitutional monarchy, the communications of sovereigns are not generally regarded as important State papers. Some of them are written for the King by his Ministers and those of his own composition are conventional in form and matter.

In view of the state of freedom throughout the world, however, it is refreshing to note that King Edward VIII. of Great Britain included in his acknowledgment of a message of sympathy from the House of Commons the statement that it would be "the first object of my life to maintain the liberties of my people and to promote the welfare of all classes of my subjects."

Dismiss it if you like, as a mere convention. The fact remains that it is still conventional for British sovereigns to mention liberty as something worth preserving and not to be ignored or dismissed as an obsolete fetish, designed to retard the solution of economic duties. With such conventions it would be foolish to quarrel while the world is reeling from the assault of leaders who laugh at liberty and insist on a tyranny which they seductively label "leadership."—Baltimore Sun.

New Insulin Most Effective

Can Be Administered In Fewer And Smaller Doses

A new insulin which promises to make the lives of sufferers from diabetes more nearly normal was announced for the first time by the Department of Internal Medicine of Harper Hospital, Detroit, before the annual meeting of the American College of Physicians at Detroit.

The new preparation is a crystalline form of insulin, the first to make it possible for physicians to give the drug at a rate approximating the natural secretion of it from the pancreas.

It lowers the blood sugar content more gradually than old insulin, the Harper Hospital physicians declared, and maintains the lower content for a longer time. It is also absorbed more slowly and therefore has an action on the body similar to natural insulin.

Experience with it to date shows that smaller doses of the crystalline product are needed, and the patient can be controlled with fewer doses. It was emphasized that it is entirely different from protomine insulin, another new insulin product announced recently, and said to be an improvement on the original insulin treatment discovered many years ago by Sir Frederick Banting and Dr. C. H. Best of Toronto.

Bread Dear In Germany

Subsidies Granted To Wheat Farmers And Imports Restricted

Germany now grows nearly all the wheat it eats. This result has been achieved by eating less bread and growing more wheat at home. In 1929 Germany imported nearly 40 per cent. of the wheat it consumed. In 1934 the imports had been reduced to about 10 per cent. German soil and climate are not particularly well adapted to wheat culture. In order to bring about the very substantial increase in domestic production which has taken place the Government has been obliged to grant large subsidies to wheat farmers and at the same time to restrict imports. In consequence, bread is more costly than it need be.—Chicago Tribune.

The Nizam of Hyderabad ordered 10,000 sheep slaughtered for a luncheon he was throwing. It seems a lot of lamb for one chicken salad.

The Croydon, Surrey, Eng., library collects an average of $500 monthly in fines imposed for keeping books over time. 2142

Mr. CAFFEINE-NERVES . . . he gets expelled from school

MANY PEOPLE, of course, can safely drink tea and coffee. But there are thousands and thousands of others who cannot. And, without realizing it, you may be one of these.

The caffeine found in both tea and coffee may be working night and day to rob you of sleep, upset *your* digestion or undermine *your* nervous system.

If you suspect that tea and coffee disagree with you . . . switch to POSTUM for 30 days. POSTUM is a delicious drink, and contains nothing that can possibly harm you. It is simply whole wheat and bran, roasted and slightly sweetened. It is economical and easy to prepare.

FREE—Let us send you your first week's supply of POSTUM—*Free*. Write for it to Consumer Service Dept., General Foods, Limited, Cobourg, Ontario.

P4-36

Little Helps For This Week

Whatsoever a man soweth that shall he also reap. Galatians 6:7.

Sow love and taste its fruitage pure,
Sow peace and reap its harvest bright;
Sow sunbeams on the rock and moor,
And reap a harvest home of light.

The life above is the ripe fruit of the life below. The inclinations of the soul which shall issue hereafter in perfection must be trained in us throughout the whole course of this earthly life. The future perfection of the saints is not a translation from one state or disposition of the soul into another, but the carrying out as it were the blossom and fruitage of the one and same principle of spiritual life which through their career on earth has been growing into a promise of perfection, reaching upward after perfect holiness.

London's First Steam Railway

Inaugurated In 1836 But No Trains Ran On Sundays

The public opening of the first London steam railway took place a hundred years ago.

In 1803, a railway, worked by horses, was opened for traffic. And five years later, Richard Trevithick, the Cornish inventor, tried to attract the public to a locomotive running on a circular track where Euston Station is to-day.

But it was not until 1836, the year before Queen Victoria came to the throne, that steam locomotives ran over a railway track in the London district.

This was known as the London and Greenwich line. The receipts for the first week were only $85, and for the second week $155. Part of this money was paid by the public for the privilege of walking along the new line on Sundays, when no trains were run.

Substitute A Success

Fascist Scientists Produce Soap From Milk Residue

Soap from milk residue is the last word in Italian inventions produced by Fascist scientists who have rallied to their respective laboratories at the Duce's plea to find substitutes for every raw material which Italy formerly imported.

The new invention will save great quantities of soap fats which can now be released for more important uses.

It is calculated that the new "milk-soap" will cost each person not more than one-tenth of a cent per day with normal use.

From the same substance are being made other products for the cleaning of pavements and metals.

The seven ages of woman are her real age and six guesses.

Thick eyebrows may be made thin, but it takes a lot of pluck.

Many Bachelor Monarchs

King Edward Not First One To Occupy British Throne

There is much speculation whether King Edward VIII. will marry or not, the popular impression being that as he did not do so as Prince of Wales he is not likely to now, being over 40 years of age.

There are, however, plenty precedents for royalties not marrying until after they ascended the throne, and for not marrying at all.

British rulers who did not marry until after becoming king were Henry I., Henry III., Richard II., Henry VII., Henry VIII., who became the most married of all kings, James I., Charles I., Charles II., and George III. Some of these marriages had far-reaching results on British history, most of them being arranged for political purposes. If Edward does marry it is more unlikely there will be any political angle to it at all. He will marry to please himself, because he loves, and no doubt it will be to someone worthy of him.

Then, of course, there was Queen Victoria, who married Prince Albert.

There were also several unmarried rulers. Queen Elizabeth was the earliest, and there were Henry V. and Edward VI.—St. Thomas Times-Journal.

Although the gorilla spends a great deal of time in making his bed, he will not sleep in the same bed two nights in succession.

Ethiopian natives sometimes mark trails by tying knots in flexible saplings.

Trans-Atlantic Air Service

Semi-Weekly Flights Between Britain And America To Start This Summer

Eugene L. Vidal, United States director of air commerce, told an American Legion meeting semi-weekly trans-Atlantic flights between Great Britain and North America will start this summer on regular schedule.

Imperial Airways and Pan-American Airways each will send two planes a week across the Atlantic, Vidal said. Passenger service, however, will not be inaugurated for "some time."

The planes will use the Newfoundland and Ireland route in summer and the Azores and Bermuda route in winter.

France plans eventually to make the Atlantic flight in a single jump, Vidal said, while German aeroplanes will use catapult ships in the vicinity of the Azores.

Clever Blind Girl

Twenty-nine-year-old Mary Doyle of Boston, blind since babyhood, knits, crochets and makes toy animals and dolls which she has never seen. Miss Doyle needs only a metal or wooden figure as a pattern; she learns it by touch and starts the object. Among the toys she has made are kangaroos, penguins and elephants. Each is made in perfect proportion.

It's best not to ever try to compromise with evil, because in nearly every instance evil gets the best of the compromise.

Review of Eighth

(Continued from Page One)

near the close of the session when the bill providing for this tax was passed. It is estimated the revenue from this source will be about $2,000,000.

Hon. W. A. Fallow, Minister of Public Works, announced that the province hoped a beginning may be made this year on a five-year program to hard-surface or pave 1000 miles of provincial highways. In reply to a question asked by J. J. Bowlen, Liberal, Mr. Fallow said: "It's the policy of the government to complete its road program over a period of five years and we hope to get it underway this year."

Speculation ran rife as the close of the session drew near as to what had become of the Alberta Basic Dividend Society, under the leadership of A. Shandro, who had declared several times before the session that he was going to lead delegations numbering hundreds to the legislative buildings to demand their basic dividends. No sign of these demonstrations was seen and Mr Shandro has now explained that it has been decided to postpone the event until Premier Aberhart has had ample time to fulfill his promises. That sounds like a Gilbert and Sullivan situation and the government will have to wait the full 18 months now before it sees Mr. Shandro leading his dividend demanders to the assault.

It was stated during the week once more by members of the cabinet that the government will redeem provincial savings certificates in needy cases, "if they are not too high." Hon. E. C. Manning made the statement that the government will make every effort to redeem all certificates as quickly as possible. Payment on these certificates was suspended by the U.F.A. government before it left office last August.

The right of farmers who are in difficulties to apply to the Debt Adjustment Board for assistance in effecting adjustments of liabilities was not disturbed in the bill passed by the legislature to repeal the Agricultural Stabilization Act. Under this act it will be the duty of the board to assist every resident farmer who makes such request for aid in making out proposals for adjustments, or arrangements for his indebtedness under the Farmers' Creditors' Arrangement Act or any similar act of the Dominion parliament. The board may provide the farmer with such legal or other assistance as he may require.

At the last minute before prorogation a change was made in the new provincial act providing for compulsory refunding of the province's public debt. The amendment made it possible for the debt to be refunded in part or as a whole and for the bill to be proclaimed either in part or in whole.

Premier Aberhart stated this week that the treasury department is now working on plans for refunding the province's debt within 90 days, but no definite announcement is likely to be made yet.

"Many of the bond and debenture issues now outstanding call for payment of interest during the next three months," the premier said, "and we want to arrange refunding of each issue on its interest date."

Liberal quarters are considering seriously the selection of a member to succeed Mr. Justice Howson, who resigned his seat in the legislature on being elevated to the bench. So far several names have been mentioned prominently, R. C. Marshall and E. C. Fisher, Dr. Walter Morrish, Mrs. Marion Conroy, S. Staveley Kerr, Lieut.-Col. G. B. McLeod, J. C. McDonald, K.C.; H. H. Parlee, K.C., and Nelles V. Buchanan are among the number.

Conservatives will not place a candidate in the field unless there is an open fight, with other parties running candidates. Should the Liberals be granted an acclamation for the seat, there will be no effort to prevent it by his party, D. M. Duggan stated.

Prorogation of Legislature

Tuesday morning, April 7, the first session of Alberta's eighth legislature was prorogued by His Honor W. L. Walsh, Lieutenant-Governor of the province, with due ceremony. There was none of the picturesque display seen at the opening ceremonies, however, and the prorogation came after a morning of almost feverish haste in getting the business of the House put through in time.

On bill, an act to empower certain cities in Alberta to refund their debts at lower rates of interest, was allowed to die on the order sheet and never came before the members. Altogether 114 bills were introduced and 108 of them became law during the nine weeks' session.

The session set a record in many ways. It was a one-sided House, with only seven members sitting in opposition, all the rest of the 63 being members of the government party. There were only two night sittings during the session and less meetings of standing committees than usual, and the legislature for the first few weeks proceeded in a leisurely manner, taking a ten-minute recess each afternoon and time to thoroughly debate every bill presented.

Outstanding in the legislation passed was the Social Credit bill, enabling the government to proceed with an investigation of a plan of Social Credit and to put in operation such a plan; codes legislation leading up to the "just price" of the government's platform, the recall bill, opinions of its workability differing, and the refunding bill to place the province's debt on a lower rate basis.

Perhaps few legislatures in recent times have placed such a string of radical and important legislation on the statutes at one session.

During the session, the dramatic episode between Major C. H. Douglas and Premier Aberhart held a prominent place in the minds of the members, and the final breaking was felt to have cleared the air. It was a striking session, with plenty of world-wide interest shown in its doings.

Claudette Colbert At the Avalon

Patrons of the Avalon Theatre are in for a treat this week, when they will see Claudette Colbert in "She Married Her Boss."

It's a gay tale, lightly written, brightly played and directed with emphasis on laughter. Claudette, charmful as ever, thistledowns through her role with an enjoyment which is imparted to her audience. Little Edith Fellows, as the evil elf of a problem child, shares major honors with the grown-ups, while Jean Dixon and Katharine Alexander lend valiant support. Mr. Bartlett hasn't much to do but he sings charmingly. Melvyn Douglas turns in a topping portrayal as the man-who-regains-his-sense-of-humor.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE MATTER OF THE ESTATE of Charles R. Abbott, late of near the Town of Lacombe, in the Province of Alberta, Farmer, deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above named Charles R. Abbott, who died on or about the 3rd day of March, A.D. 1936, are required to file with Montreal Trust Company, Edmonton, Alberta, Administrator of the Estate of the said deceased by the 11th day of May, A.D. 1936, a full statement duly verified of their claims and of any securities held by them, and that after that date the Administrator will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which Notice has been so filed or which have been brought to their knowledge.

DATED this 7th day of April, A.D. 1936.

J. S. McCORMICK,
Lacombe, Alberta.
Solicitor for the said Administrator.

Canadian Turkey Hard to Beat

In the British Fish Trades Gazette, published in London, Eng., one of the leading publications dealing with the produce trade, there has appeared recently several commendatory articles on Canadian agricultural products, principally with reference to poultry. In its issue of Mar. 7, 1936, one of its writers states:

"The class of turkeys which are arriving from abroad—this is, the fresh killed varieties—are very good. "Apart from these we shall no doubt have some Canadian birds on show, and as you know, a good Canadian turkey wants a lot of beating if it is the right quality and pack.

"To sum up the turkey trade, I consider that the most reliable pack to which to look forward during the next few months will be the Canadians if they can be shipped at a reasonable price. Present quotations are rather beyond the reach of the trade, but holders on the other side may think differently in a few weeks' time."

Bentley

BENTLEY.—Mrs. Talbot and children spent the Easter week-end at Calgary with Mr. Talbot, who is working there.

Dr. Henry was in Edmonton a few days last week.

Mrs. Elchenlamb of Edmonton has been the guest of her sister-in-law, Mrs. Bergum, for the past two weeks.

Services were held at the United Church Good Friday evening. The Sunday previous, Rev. J. McLennan held service for the first time for seven weeks, owing to his illness.

Mr. Wilkie, his wife and daughter Shirley are spending the Easter holidays with Mr. Wilkie's parents in Edmonton.

Miss Skocdopole is spending the Easter holidays at her home at Botha.

Fern and Donald Surrat, accompanied by their sister, Mrs. Cecil Culp, and Mr. Culp, of Rimbey, returned from Arrowwood on Wednesday last, where they had been to attend the funeral of Mr. Culp's sister.

The Ladies' Aid of the United Church held a successful tea and apron sale at the club rooms Saturday afternoon last. C.G.I.T. girls were in charge of a candy and cookie booth.

Robert Thorp, who is attending the Technical School, Calgary; Ernest Evernden, at Deisel Engineering School, Calgary, and May Trimble, attending High School at Red Deer, are spending holidays at their respective homes here.

Mr. and Mrs. Vanderwoort spent the Easter week-end in Calgary.

Th Musical and Dramatic department of the C.J.C. College, Lacombe, presented a mixed program of vocal and instrumental music, dialogues and readings at the Bentley Community Hall on Saturday evening last. There were some 20 odd numbers on the program and all were excellent. There was a male chorus of 12 voices, a girls' chorus of 15 voices and a double quartet of eight male voices. Each gave several numbers, besides the solos, instrumentals, readings, etc.

The Social Credit Session

(Continued From Page One)

collect. Alberta would have been in much better health now, had the preceding Government acted with such courage five years ago. With such a brave beginning, it is unfortunate that the Government permitted the default of the province and most regrettable when it is known that such default could have been avoided at no cost to and no sacrifice of principle by the province.

If the default on the April payment meant nothing more than that Alberta didn't have the money when the mortgage came due, but will continue paying the interest, then no person will be much worse because of the affair. But it will mean much more than that. This default was followed by an intimation that Alberta might repudiate at least part of its interest payments, and what could the bondholders do about it? The province is now paraded all over the world as a poor, delinquent pauper, unable to meet part of its obligations and unwilling to pay its debts. By this combination of default and partial repudiation, Alberta would cut itself away from every available money source. I appreciate the Government's desire to limit Alberta borrowings but I am sure the province cannot live completely by itself, without paying an alarming penalty. That is the direction in which the province is heading.

An alarming part of it all is that the individual is branded by the policy of the province and the farmer, merchant and business man will find his credit destroyed merely because of the rash policy of the administration.

Of the hundred and two bills passed, I shall refer to but three and to them very briefly.

1. Qualification of Tradesmen—I am not certain if this bill was put through. I shall say no more than that it is dangerous legislation, and the province will repent before long that it became law.

2. The Codes—This legislation with arbitrary fixing of prices and additional Government interference in the details of business attracted much attention and was very fully discussed. I doubt if it will work to the benefit of the consumers or even to the merchants. It has not worked satisfactorily in countries better prepared for such organization than Alberta. It may lead to the increased cost of living and will not likely lead to improved service. However, that is an act the working of which it will be interesting to watch.

3. The Recall—I have often been asked if I regarded Mr. Aberhart as sincere in his efforts and invariably answered without hesitation that I did. That confidence was first shaken in reading the Recall legislation. That he should permit the statute books to be cluttered with such senseless and unworkable legislation, so that he might fulfill an election promise, indicates an amount of guile of the cheaper sort that it is alarming. Had the legislation been entitled "An Act to Make Recall Impossible" the description would have been nearer the mark. It isn' recall legislation . . . it is a life preserver. This monstrosity must have been forced on the Premier by a much-scared caucus.

I am frequently asked, and I expect that many Albertans are asking themselves, two leading questions about the recent session:

1. Did the Social Credit Party strengthen itself during the session?

The Government did not make any gains and no one hears of any new converts to the cause, but it must be admitted that it held its ground fairly well. The wonderful organization throughout the country kept intact and without any serious breaches. Some supporters were disappointed by the indecision respecting Basic Dividends but Mr. Aberhart succeeded very well in postponing the zero hour without losing many supporters.

2. What about the future? Will Basic Dividends ever be paid, and if so, when and how?

No sane person will venture to do much long range or even short range predicting about Alberta. This is certain—Basic Dividends are more visionary now than they were six months ago. Then, many believed that Major Douglas had a plan, definite and well arranged, and almost ready for application, and that Mr. Aberhart, well skilled in the details, was waiting, all ready, to give a hand at the application. Now we know that neither had a plan. Major Douglas has given up the hunt and Mr. Aberhart is appointing a committee to make the search.

The Churches

THE CHURCH OF ENGLAND IN CANADA

What About State Medicine?

State medicine as a solution of the "cost of health" problem is a subject very much in the air in the Western Canadian provinces just now and judging from cumulative public demands it is only a question of time and probably a very short time before state medicine or public health insurance, in whole or in part, will be in effect generally in the west.

It is perhaps not surprising that the public mind is rapidly crystallizing in this direction. A number of factors are responsible for this. One of them is the much publicized depression of the past few years. During this period local governments have found it necessary to provide medical and hospital care for a large number of relief recipients and, of course, the cost has had to be passed on to the taxpayers.

In addition to that, very many of these taxpayers have during the past few years found it increasingly difficult to keep pace with growing tax bills and at the same time stand the expense of hospital and medical bills for themselves and other members of their families, for they have found that medical and hospitalization expenses have not declined in proportion to their own incomes.

Further than that all classes of the community are demanding a high standard of medical and hospital service. The hospitals that are best endeavoring to cater to this demand find that they cannot continue to operate at much less than pre-depression costs because of the difficulty of collecting accounts and the doctors declare that they cannot afford to reduce their fees to a scale commensurate to the pocketbooks of their clients because they, too, find the percentage of accounts they can collect from paying patients diminishing.

With this situation staring them in the face people generally are turning in the direction of state medicine as a way around these difficulties and the move is receiving support from at least some of the members of the medical profession.

The question, however, is a big one and bristles with many features which deserve full consideration before the plunge is made. While state medicine undoubtedly offers advantages there are some phases which should be dissected with care.

Not the least of these is the question of cost and how it is to be distributed. In other words who is to provide the means and from what sources. It would also be the part of wisdom to ascertain with reasonable certainty that the advantages which the most enthusiastic advocates of state medicine claim for it can be realized in full degree before a complete scheme is made operative and whether the benefits are likely to be commensurate with the cost.

British Columbia and Alberta governments are both discussing health insurance schemes of more or less provincial scope and considerable pressure is being brought on the Saskatchewan government to adopt a scheme with prospects that before the legislature now in session adjourns, some consideration will be given to public demands.

The British Columbia plan makes provision for partial medical, hospital and dental services for certain specified classes of the community. Yet the total outlay is estimated at $7,287,500 a year or $12.50 per person. The amount to be contributed by the provincial government is limited, which may result in curtailment of the benefits and hospital service is limited to 21 days.

The Alberta Health Insurance Act, passed by the former legislature, but not yet brought into operation by proclamation, is based on the local option principle. In other words it can be brought into effect in any district in which the majority of the electors so decree by vote.

The Alberta measure provides for full medical, dental, hospital and nursing services without some of the limitations prescribed in the B.C. plan, but the total estimated expenditure is $14.50 per person per annum, of which the district would contribute by local taxation $11.28 and the province $3.22.

Varying estimates have been made of the cost of a full scheme for Saskatchewan ranging from $8,305,000 to $6,786,000 for a service exclusively for farmers and members of their families, the latter figure being quoted by the rural municipal organizations, provided a similar plan to that proposed in Alberta were adopted.

Even on the basis of the latter total expenditure, the average annual cost per municipality, it was found, would be $22,472, involving a municipal tax levy for that purpose alone, above or below ten mills depending upon assessment and population.

With these figures in mind and remembering the depleted state of provincial and municipal treasuries and the difficulty of collecting taxes under conditions which have existed in recent years it would appear reasonable to suppose that no complete scheme could be financially successful without some assistance from the Federal government or unless some other source of revenue than the land within the province adopting such measure can be found.

Taking all circumstances into consideration it might be wise, if the adventure is to be made, to try it out on an experimental basis, either by applying a complete scheme to a group of municipalities or district with the provincial government guaranteeing a deficit or by applying a partial service to an entire province. A test on some such basis would yield practical information as to when and how far further extensions could safely be made.

Increases Brain Pressure

Doctors Claim Noise Adds As Much As 400 Per Cent.

Noise increases the pressure on the brain, sometimes as much as 400 per cent., and causes loss of temper, irritability and undue excitation, a symposium on "The effect of Noise in Health and Disease" at the New York Academy of Medicine revealed.

Experiments at Bellevue hospital which measured brain pressure were described by Dr. Foster Kennedy, professor of neurology at Cornell University Medical College, who found that exploding an inflated paper bag increased the brain pressure to four times normal.

Dr. E. P. Fowler warned that some of New York City's very loud noises endangered the ear drum membranes.

Not Just A News Paper

"If a member of your family died, would you send out the obituary in a circular letter?"

A South Dakota editor asks that question of his readers. The rest of his front-page box reads like this:

"If your wife entertained would you run a slide on the screen of the movie show? If you were to enlarge your store, would you tell folks in a hotel register? If you were to have a wedding at your house, would you tack the news on a telephone pole?

"Then why don't you put your advertising in the newspaper, too?"

On Oland Island, Sweden, a new source of helium has been discovered.

Would Scrap Auto Horns

Not Needed With Good Brakes Opinion Of Careful Driver

I have been closely connected with the building of automobiles and everything that goes with them for more than 30 years. I have driven over all the United States and Canada and never had an accident. Never had a traffic violation ticket of any kind. Modestly, I believe that I am competent and qualified to ask questions.

Why not scrap the horn and remove it from all cars except police, fire trucks and ambulances? The horn has proved to be a menace and everyone would be better off without it.

The brake takes the place of the horn on my car at all times. For any argument in favor of the horn, my answer is: Press on the brake first.—Letter in Detroit Free Press.

Pedigree Certificates

The pedigree certificates registered by the National Live Stock Records, approved by the Dominion Minister of Agriculture for the month of January, 1936, amounted to 10,029 including 416 for horses; 4,979 cattle; 1,386 sheep; 696 swine; 526 foxes; 624 dogs; 1,390 poultry, and 12 goats.

To fight the Dutch elm disease that menace's America's elm trees, 3,000 men are at work on a program costing $2,500,000.

Drought in winter is as dangerous to crops as summer drought.

There is no guess work in the milling of Purity Flour. Twice-daily baking tests by our laboratories ensure even, dependable and uniform quality. Enjoy the finest cakes, pastry, rolls or bread you ever tasted. "Purity" goes farther.

PURITY FLOUR
Best for all your Baking

Empire's Best Salesman

King's Visit To Industries Fair Is Helping Business

Edward VIII, as King promises to be an even greater salesman for the products of the British Empire than he was as Prince of Wales.

This was strikingly borne out by the first comprehensive reports of the result of his visit to the British Industries Fair.

A New York tobacconist bought up all the samples of apple-shaped briar pipes the King admired at the Malta stand without even asking what the pipes would cost. He is planning to make a special window display of them in New York.

Malta has sold all its briar pipes, in fact, largely as a result of the King's visit. A thousand gross has been ordered and the Mediterranean island will be working for more than a year on them. Arrangements have already been made for extension of the Maltese pipe works, increasing employment by 25 per cent.

Also, substantial orders were placed for Malta's homespuns following a remark by the King that he had received some napkins made of the homespun from Lady Louis Mountbatten.

Ostrich feathers and sealskin slippers, a pair of which the King accepted from the Newfoundland stand, both benefited from the royal visit. The King had said he would like to see ostrich feathers come back, but wondered whether he could influence women's fashions.

"The King's interest in ostrich feathers had a tremendous repercussion," said W. E. Henriette, of the South African trade commissioner's office. "It has brought in inquiries, mostly from milliners for decorative purposes, to an extent that we had never looked for.

"The industry has been moribund for years and years and the King definitely revived it." The good impression the King created while he was visiting in Hungary last year has also favorably affected British business. Two Hungarians at the fair declared they had spent £6,000 on orders directly because the King had bought things at Budapest.

Soldier By Chance

Lord Baden-Powell Took Army Examination Just For Fun

It was almost by chance that Lord Baden-Powell, who has just entered his 80th year, became a soldier. When he left Charterhouse School it was intended he should go to Oxford, but "just for the fun of the thing," as he says, he entered for an army examination. No one was more surprised than he when the results were announced, and he found himself second on a list of over 700 candidates. Brilliantly as he succeeded as a soldier, he might have done almost equally well in half a dozen other professions, for he has displayed exceptional gifts as artist, musician, actor, and author, says an English writer.

Pensions Court Hears Appeals

Many Cases Awaited Consideration At End Of 1935

A total of 789 appeals awaited consideration by the pensions appeal court at the end of 1935, according to information tabled in the House of Commons by Hon. C. C. Power, minister of pensions and national health. Of this number, 27 were appeals of the crown from the pensions commission, 651 were appeals of applicants from the same body, and 111 were in "other categories." The return showed 36 appeals were allowed by the court in 1935, while 1,603 were disallowed.

His Business Card

Sandy joined a golf club and was told by the professional that if his name was on his golf-balls and they were lost they would be returned to him when found.

"Good," said the Scot, "put my name on this ball."

The pro did so.

"Would you also put M.D. after it?" said the new member. "I'm a doctor." The pro obeyed.

There's just one more thing," went on the Scot. "Can ye squeeze 'Hours 10 to 3' on as well?"

Chief Slept Through Fire

"Deep in the Sleep" might well be the title of this little story. John Andresen celebrated his election as chief of the volunteer fire brigade at Anchorage, Alaska, by sleeping through the first fire. The station siren aroused the whole town but not the chief, just a block away. His wife, a night telephone operator on duty, couldn't raise him either.

Glass wool can now be made so fine that 100 fibres of the glass make a thread no thicker than ordinary No. 50 cotton.

More than 42 per cent. of the sales of farm products are made during September, October, and November.

Buildings in Japan are limited to a height of 100 feet, or eight floors, above street level.

Give a man rope enough and he may be able to get his car going.

Charcoal was the fuel used prior to coal in forges.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 2nd.

Maintained Tradition

Lost Pilot Thanked Rescuers In Approved British Manner

Great Britain is glad to welcome Mr. Herbert Hollick-Kenyon, British pilot, as a worthy upholder of the noble traditions of those who, rising to a great occasion, say the right, proper and inevitable words. Mr. Kenyon, it will be recalled, was lost in the Antarctic with Mr. Lincoln Ellsworth, and was rescued by the crew of Discovery II. As these men came over the ice, Mr. Kenyon exclaimed. "I say, it's awfully decent of you fellows to drop in on us like this!"

This is in the approved British manner. Other countries, of course, do these things differently. The Frenchman, Danton, faced by his enemies in the Revolution, struck himself on the chest, and thundered, in a voice that could be heard by thousands. "Danton, no weakness!" Frenchmen seem to have the knack of thus heightening the dramatic effect of an occasion by some rhetorical gesture; on men of British birth the trick does not sit easily. When Burke flung down a dagger on the floor of the House of Commons, it merely made everyone laugh.

No, the proper British method is the sublime use of bathos. Stanley's "Dr. Livingstone, I presume?" on ending his long search for that explorer in the sands of Africa, is famous. So, when Pitt heard of the news of a Napoleonic victory that shattered all British hopes, he observed, "I think I could eat one of Bellamy's pork pies." Mr. Kenyon has maintained and strengthened the tradition. — Christian Science Monitor.

MAKE YOUR OPPORTUNITY

What with more employment about, more trade, and more money to spend, now's the time to make the most of opportunities—for as Shakespeare wrote, "There is a tide in the affairs of men, which taken at the flood, leads on to fortune."

Obviously this is a time to make the opportunity, look for it, and if some have the desire, and lack the urge to do so, then their stock of nerve force is disastrously low, and should immediately be raised to the necessary working power level with Phosferine.

As always, the race is to the strong, and the energising vitality of Phosferine ensures that one easily holds one's own in competition with others. The origin of most failures, disabilities, and inferiorities, is deficiency of nerve force, which a short course of Phosferine soon replaces with the stamina to make your opportunity!

Old House May Be Sold

Late King George Visited It In Halifax 40 Years Ago

Ware House, at Cole Harbor, a few miles from Halifax, which the late King George visited as a Midshipman 40 years ago and which once rung with royal voices, will be advertised for sale and removal unless someone will undertake the expense of restoring the property, the Halifax county council has decided.

Years ago the Ware family sold the house and went to the Canadian west. The property was purchased by the County of Halifax and used as a residence for the caretaker of the County's Poor Home, nearby. When the home was burned down, it was abandoned.

Had To Trade Property

Owners Arranged Matter When House Put On Wrong Lot

Milton Brenner, councilman of Pasadena, Calif., went to see a lot he just had purchased and rubbed his eyes.

On the lot was a house and Brenner was certain that two days before there had been no house there.

Investigation revealed a house mover had delivered the home to the wrong address.

It should have been placed on a lot next door, so Mr. Brenner and the home owner just traded their property.

Move Toward Set Calendar

Reform Urged Before British House Of Lords Recently

A movement seeking establishment by the League of Nations of a fixed international calendar is under way in Great Britain.

Calendar reform was urged before the House of Lords by Lord Merthyr, who advocated adoption of the 13-months calendar now used by some governmental departments, unions and industrial organizations.

Lord Desborough, on the other hand, urged a 12-month calendar with equal quarter and half-years.

Minnesota imposes 82 different taxes on her citizens.

Haggis From France

Scotsmen in Canada Feel National Dish is Insulted

Ottawa.—Scotsmen in Canada are in a bad way. They can get no haggis from Scotland, but to add insult to injury they have been told they may get them from France.

William Fraser, Liberal member for Northumberland, brought the matter to the attention of the high court of parliament and asked Hon. James Gardiner, minister of agriculture, what steps the government proposed to take to restore to Scotsmen their ancient rights. He got no immediate answer.

The member based his question on a letter he had received from a prominent citizen who said: "As a Scotsman born in Dumfrieshire of sheep-stealing ancestors I am passionately fond of the national dish of Scotland, namely the haggis."

The writer went on to say he had been accustomed to import haggis for many years but recently was informed a permit from the department of agriculture was required. After much correspondence he found the permit would be issued by an official in Edinburgh and after more difficulties got the permit. He ordered his haggis but the shipment was stopped at Montreal.

Television In Germany

Service Used In Telephone Booths At Leipzig And Berlin

Television between two cities was made accessible to the public by the German postal ministry as the Leipzig Spring Fair opened.

Special booths were installed at Berlin and Leipzig, equipped with an ordinary telephone receiver, a microphone and a window-like contraption on which the face of the person at the other end was visible on a surface approximately eight inches square.

Underneath the "window" was a strong bluish light which shone on the features of the party telephoning, giving his picture to the man with whom he conversed.

SELECTED RECIPES

ROLLED NUT WAFERS

½ cup "Crown Brand" Corn Syrup
½ cup butter
1 cup bread flour
⅔ cup sugar
1 cup chopped walnuts, or peanuts

Heat the "Crown Brand' Corn Syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

Riel Rebellion Veteran

Man Who Saw Boom Days In West Dies At Halifax

Frederick Lesieur Ray, native of Quebec City who went to Canada's west in the day of its boom and became a prominent rancher, died at Halifax recently in the home for aged men at the age of 82.

He was a veteran of the Riel rebellion and his entire property was destroyed in one of its encounters. At the end of the rebellion he returned to Halifax, where his father had brought him in 1873, and remained there the rest of his life.

The Explanation

A Scottish minister had three bottles of champagne as a birthday gift, and handed them to his housekeeper for safe keeping. A short time afterwards he was entertaining friends, and asked the housekeeper to bring up a bottle of champagne. "Champagne, sir?" she queried. "Yes," he replied. "Dont you remember the three bottles I gave you weeks ago?" "Wis yon champagne? Mercy me, sir, I thocht it was sma' beer, and had it wi' my parritch, and I aye windered hoo I wis aye sae cheery in the mornin's.'"

DOUBLE Automatic BOOKLET

A Royal Platform

Promise Made By King Edward Will Be Kept

Kings don't have to run for office; and in Great Britain, a king is sure of his job for life. It is unnecessary, therefore, for a British king to have a "platform" in the American political sense.

Whether he thought of it in that light or not, however, there is an excellent platform for a king in the speech which Edward VIII. made to the citizens of his empire. Here it is:

"I am better known to most of you as the Prince of Wales, as the man who during the war and since has had the opportunity of getting to know the people of nearly every country of the world under all conditions and circumstances. And although I now speak to you as the king, I am still the same man who has had that experience and whose constant effort will be to continue to promote the well-being of his fellow men."

This royal platform differs from the ordinary political platform in two important particulars: First, it is very simple; second, there is no doubt that its author meant exactly what he said.—Buffalo Courier-Express.

Stamp Must Be Requested

If Properly Tagged Return Poultry Crates Not Dutiable

With regard to the export of live poultry from Canada to the United States, there is no duty charged on properly marked return crates, but a duty of 30 cents per crate is charged Canadian shippers on the return of their crates into Canada, unless, prior to shipping the poultry to the United States, the Canadian shipper has the crates properly tagged by a Canadian Customs official as being of Canadian manufacture. A Customs stamp is placed by the Customs officer on wooden crates, and a metal seal is attached to metal crates. In order to have this stamp placed on the coops, it must be requested by the Canadian shipper.

A Little Known Trade

Old Firm In Sheffield, England, Makes Bread Boards

Among Sheffield's lesser known trades is the manufacture of bread boards, or platters. This has flourished since 1840, despite keen competition from countries where timber is cheap. It was a Sheffield man who conceived the idea of adding carved embellishment to the crude blocks of wood that had been used prior to that year, and although scientific machinery now plays its part in the manufacture of the boards, the ancient art of hand carving is still retained in the industry. —Industrial Britain.

Marine Oasis

Here and there in the various oceans are small areas where fresh water fit for drinking may be found. They're caused by springs in the ocean bed, with fresh water rising to the surface and pushing the salt water out of the way. There's a fresh water spring in the Atlantic Ocean off the coast of Florida near Miami.

To Encourage Women Writers

Prizes Offered For Best Non-Fiction Article By Canadian

To encourage younger newspaperwomen and stimulate interest in more inspiring journalism from women writers, the executive of the Canadian Women's Press Club announced its memorial award of $25 and a silver medal will be given this year for the finest piece of writing by a Canadian woman appearing in non-fiction.

Entries may be special articles or essays, dramatic, literary, musical or artistic criticism, editorials in magazines, newspapers or other periodicals, reportorial assignments or interviews.

This award is believed to be the first prize offered in Canada for competition among women writers for newspaper and non-fiction articles.

The contest is open to any woman writer actually resident in Canada within 12 months preceding publication of the entry, whether published in Canada or elsewhere; material will not be eligible which has been recognized by other awards.

All entries must be submitted not later than June 30, 1936, the award to be made not later than September 15, 1936; entries to go to the chairman of the Memorial Award board, Mable Crews, Ringland, Brookside, Islington, Ont.

The Memorial Award is named in honor of members of the Canadian Women's Press Club who have written their last assignment.

ADVICE TO WOMEN

ALL women at some period of their lives need a strengthening tonic like Dr. Pierce's Favorite Prescription. The young woman who suffers from monthly pains, the expectant mother who has nausea and other disagreeable symptoms, or the middle-aged woman who experiences "heat flashes" will find this "Prescription" a dependable tonic. Read what Mrs. D. James Arnott of 51 Simcoe St., London, Ont., said: "Dr. Pierce's Favorite Prescription has done a lot towards keeping me well and healthy. I used it before each of my children came and it helped to alleviate many discomforts. I also used it during 'change of life' and it helped me equally as much." Buy now at drug store.

Plenty Of Clocks

Liner Queen Mary Will Have Nearly 600 Installed

When the Queen Mary comes into service next June she will have on board 596 clocks, the largest marine clock installation in the world. The whole system will be controlled from the chart-house. It will consist of 39 specially-designed clocks for public rooms, 31 specially-designed clocks for entrances from decks, 54 specially-designed clocks for special rooms, 370 clocks for first-class cabins, and 102 clocks for galleys, promenade decks, crews' and officers' quarters.

Would Help A Lot

If the entire population could be induced to eat just one more slice of bread daily, the decline in bread consumption would be more than arrested. If Jesse Smith, president of the Millers' National Association, is correct in his estimate of results following such increase in Canada would mean an additional consumption of 742,341 barrels of flour, or 70,000,000 loaves of bread.

● Especially intended for baking purposes, Quaker *Natural* Bran mixes well and rises lightly, giving better results from your favourite bran recipes. It's economical, too . . . that's another reason why hundreds of Canadian housewives bake with it regularly. There's a valuable coupon and a book of delightful bran recipes in every package. Order your supply from your grocer today!

Look for the Quaker *Natural* Bran display at your grocer's. He has all the things you need for the delicious recipes included in the recipe folder in each package.

QUAKER *Natural* BRAN

Diamonds Have Become Indispensable Article In All Industrial Processes

Diamonds, once regarded merely as glittering gems for the adornment of feminine beauty, and coveted for their value, are now playing a prominent part in industry.

To-day there are far more diamonds used for industrial purposes than as gems. But, as hardness alone is needed for industry and not color and water, their value is less than those used for adornment.

Industrial diamonds cost from £2 to £5 a carat. A flawless gem may realize £100 a carat.

The grading, preparing, and sale of industrial diamonds is another industry which has become predominantly British.

London is now the centre of the trade, practically 98 per cent. of the world's production of industrial diamonds being dealt with within a few hundred yards of Hatton Garden.

Where once Amsterdam and Antwerp were the world centres of the diamond trade, London now reigns supreme. Amsterdam and Antwerp still do most of the diamond cutting and polishing, but the stones come from the London market.

Practically every industry now uses diamonds in one or more of its processes.

And it is diamonds, used for cutting the hardest of metals with extreme accuracy, and for sharpening and truing modern machining and grinding tools, that have in great part enabled mass production with its greater rapidity and lower costs, to be brought into operation.

Industrial diamonds play their part in producing pipe-stems, electric light filaments, cutting and shaping stone, marble, and granite in a fraction of the time previously occupied, and in boring for coal and oil.

Scientists and engineers in recent years have increased the hardness of metals so much, particularly for tool steel, that it has been found extremely difficult to get metal tools to work them.

When it was found that diamond pointed tools would cut them like cheese, diamonds became in greater demand.

Rock drilling has been speeded up so tremendously by the diamond that the diamond-faced borers now used will cut through 18 inches of the hardest granite in an hour, even at a depth of 2,000 feet in the ground.

"From the turning of vulcanite pipe-stems to the making of motor cars, there is hardly an industry which does not use diamonds in some form or other," Mr. White, of the Diamond Development Company, said.

"All the big dealers in diamonds are now in London, and it is from here that they are sent all over the world. There is also a rapidly growing industry in this country in the manufacture of diamond-faced tools for all kinds of purposes.

"Such things as motor car pistons, are now machined with diamond-edged tools, which give very great accuracy and a much smoother finish than can be obtained in any other way.

"Electric light filaments, which are made from very hard wire, are drawn through a diamond in which a hole has been bored. Extreme accuracy is necessary in this process, so that the very fine wire shall always be of the same thickness.

"When metal dies were used the hole gradually got larger, altering the thickness of the wire and changing the voltage it would stand, but many tons of wire can be drawn through a diamond without the hole changing in size at all.

"From being purely a luxury article diamonds have during the last few years become an almost indispensable article in all kinds of industrial processes, and the demand for them is increasing every year as new uses for them are discovered. Fortunately the output has increased in step with the demand."

Needs More Than Voice

Singer To Be Successful Must Have Brains Too

Antonio Scotti, the celebrated operatic baritone who is dead in Naples, was a good example of the fact that voice is not the only requisite for a world-famous singer.

Scotti's was not one of the great voices. But he had fine intelligence and high artistry. With these he made audiences forget that he had not the God-given voice of a Battistini.

Many a greater voice has not gone so far and could not because there was not the gray matter behind it.

Good singing, like good seeing, is done with the resources that reach to the top of the skull.

Trapped By Peanuts

Peanuts are used by Patrolman Geo. Maestressat, San Jose, Cal., to trap auto-parking violators. He places a peanut under the rear wheels of automobiles on his beat. An hour later he returns. If the peanut is crushed, he knows the auto has been moved. If not, the owner gets a tag for over-parking.

China was the first land to adopt paper money, 807 A.D.

A Very Useful Organ

Many Ailments Warded Off By Nose States Doctor

The following interesting article is by Jas. W. Barton, M.D.: It is said that the farther north one travels the larger will the noses of the inhabitants be found.

During cool or cold weather, which together make up a considerable part of the year in the northern climate it is out of the question to breathe unwarmed air. Our lungs would soon pain us to an unbearable extent. Strenuous exercise in cold weather brings a sharp pain stabbing the lungs as the air is drawn in, part through the mouth, to meet the great demand of the lungs for air. Because of these conditions natives of colder climates are equipped with long noses as compared with short noses of natives of warmer climates where nature partially prepares the air for human use. Residents of a cool climate require plenty of radiator space within their noses."

I am quoting Fassett Edwards in an article on The Nose in Hygeia.

However, air needs more than warming before it enters the lungs. Some of the dust of the air should be removed by the tiny hairs inside the nose, the air must be moistened, and what is even more important, various infectious ailments are prevented if the moist mucous lining of the nose is in a healthy condition.

There was a time when the most important consideration was the amount of air that entered the lungs through the nose. If the middle partition of the nose (the septum) was bent an attempt was made by surgery to straighten it. And if the bony processes on either side of the nose were very large and obstructive, the removal of a part of these bones was done by a surgical operation.

To-day it is felt that in a number of cases this enlarged bone may have to be removed, but the operations are not as frequent now and every care is taken to preserve as much of the mucous lining of the nose as possible. This mucous lining is so powerful in warding off the ailments that come by way of the air—children's diseases, tuberculosis and others—that after battling harmful organisms successfully it is ready to do so again within five or ten minutes.

The nose is a useful organ aside from the above as taste is felt to be at least three-quarters smell. An inflamed nose from a cold makes food almost tasteless.

Making Underground Quiet

London Tries Track Welding To Cut Train Nbise

Quieter operation is coming to the many miles of railway that burrow beneath London.

It is hoped to start silencing large sections of the track during 1936. The London Passenger Transport Board plans to make the underground railways of London as silent as surface travel. Engineers have proved that this is possible. Six months of trial of silencing methods in half a mile of busy tunnel near the centre of London came to an end in March.

"The experiments we have been conducting between the Leicester Square and Goodge Street stations have been very encouraging," a London Transport official said. "We have eliminated the rattles and bumps of the wheels, and most of the mechanical noises, intensified in such narrow tunnels, are now absorbed by the walls and not thrown back into the carriages."

Along the two miles of track over which the experiments are being conducted the rails have been welded together, so that there are no joints to cause thumping noises as the wheels pass over them. The welding will, it is said, reduce wear and tear of the rails and wheels. Engineering difficulties are increased, however, in case of a breakdown or failure of any section of line, when the rails have to be unwelded.

Along the walls of the tunnel, at carriage window level, asbestos skirting has been put up. This skirting absorbs noises which were previously reflected by the curved sides of the tunnel.

Passengers riding in trains which pass the experimental section of the tunnel have expressed astonishment at the degree of silence obtained.

Mass production was a familiar idea to Roman industry 2,000 years ago.

Italians in South Africa are contributing to Italy's war expense in Ethiopia.

The world record for cold is 90 below zero, Siberia; the United States' lowest record is only 66.

The nearest star in the firmament is 25,500,000,000,000 miles from the earth.

They Found A Man

Former Prince Of Wales Astonished Guests At Luncheon

Wickham Steed, in the Christian Science Monitor, paid this tribute to King Edward VIII.:

After the peace his (the Prince of Wales, now King Edward VIII.) travels began. These, too, he took seriously. When he came back from Canada the Lord Mayor of London gave a great luncheon in his honor. The Prime Minister, Mr. Lloyd George, was there to propose the Prince's health, and did so with sly humor. The Prince was expected to read a well-phrazed statement upon his journey through the Senior Dominion; and Mr. John W. Davis, Ambassador of the United States and worthy successor of Lowell and Choate, was to speak to the toast of the Lord Mayor. We all thought the Ambassador's speech would be the event of the day.

In a way, it was. On rising, the Prince of Wales gave Mr. Lloyd George tit for tat in some excellent banter. Then, dropping a prepared manuscript, he spoke of Canada so brilliantly, so shrewdly and so movingly that at the end we let ourselves go in rousing cheers. We sighed as we remembered that John W. Davis had still to speak.

We need not have sighed. I saw Mr. Davis turn his notes face downward before he rose and said: "My Lord Mayor, Your Royal Highnesses, Your Excellencies, my Lords, Ladies and Gentlemen, I have the honor to propose the health of the Rt. Hon. the Lord Mayor"—and sat down. We cheered lustily.

We had gathered to honor a Prince and had found a Man, young, keen, discerning, sympathetic, on whose brow the Crown might one day worthily rest. Since then we have had much reason not to change our minds. We believe Edward VIII. will make good.

He will do it in his own way. It will hardly be the way of his father or of his grandfather. The throne stands high above party but its foundations are in the hearts of men. Nowhere are they now deeper than among the humble, for the humble and needy were nearest to the heart of Edward, Prince of Wales.

Where Queen Mary Will Live

Marlborough House Likely To Be Her Future Home

The palace where she lived as a bride is understood to be the place Queen Mary will live as a widow, Marlborough House.

The birthplace of King George, empty since Queen Alexandra died there 10 years ago, has 200 rooms, and is the largest royal residence in London excepting Buckingham Palace.

But its five-acre garden is a homely haven of peace, filled with old English flowers, such as geraniums, foxgloves, snapdragons—favorites of Queen Mary.

In a secluded corner is the Pets' cemetery, an innovation of Queen Alexandra. Here are rows of tiny tombstones, each bearing an epitaph to some beloved dog.

Only once a year since 1925 has there been any sign of life about the ancient red brick building.

This was when the Prince of Wales, lent the garden for an annual children's charity fete.

Then switchback and hobby-horses, swing-boats and helter-skelters, and even a circus, combined to entertain hundreds of children, including the Princess Royal's two schoolboy sons, and the Prince of Wales himself stepped across from St. James' Palace, hatless, to join in the fun.

Queen Mary herself supervised the modernization and restoration of the house a few years ago, when King Edward had thought of living there.

She is likely to move in as soon as the house can be got ready—probably in a month or two.

Was Right At That

An Englishman who was traveling in the United States, was asked how the highways in the United States compared with those in England, and he replied that there was a contractor by the name of Dixie and another by the name of Lincoln that built excellent highways in the United States; but there was a Frenchman by the name of Detour whose work was terrible.

Over Million In Bonuses

The government paid $1,033,869 in cheese bonuses during the latter half of 1935, according to information given in the House of Commons by Agriculture Minister Gardiner. Payments by provinces included: Saskatchewan, $5,574; Alberta, $11,232; British Columbia, $4,996.

In China, breakfast is called Tsao-Fan (morning rice), while dinner is known as Ouan-Fan (evening rice).

Lake Titicaca, one of the world's mountain-high lakes, spreads over 4,500 square miles of the border country of Peru and Bolivia.

If you promise to meet a person at 3:30, always be there at 4. Then you have only five minutes to wait.

It is not necessary to be a Boy Scout to do a good turn a day.

The SNAPSHOT GUILD

KNOW YOUR CAMERA

Remember that snapshots of your child doing something make the most fascinating pictures for your memory album.

Judging from the letters the Guild has received old Santa Claus must have pulled many cameras out of his bag and quite generously presented them to those of all ages.

Although modern day film has simplified snapshooting and allows for a certain amount of variation in shutter speed and lens aperture, some owners of new cameras seem to be having a little trouble in getting properly exposed snapshots.

Well, the first time you played golf you didn't get a perfect drive, did you? It's practice and experimenting that make for improvement.

Here's a suggestion that will help you get better results; that is, if you follow it.

When you take a picture make a note of the "stop" you used. By that I mean, the first or second opening, if you have a box camera, or if you have a folding camera you should also make note of the speed of the shutter, that is, 1/25th of a second, 1/50th or whatever it may have been. When the prints are returned you can look at them and say to yourself—"This one of Billie is awfully dark and doesn't show up as I expected. Let s see now—I took this picture at noon at 1/50th of a second and had the diaphragm set at f.11. A little too fast to get the proper exposure under a hazy sky. The next time, under the same conditions, I'll either set the diaphragm pointer at f.8 to let in more light or else leave the diaphragm opening at f.11 and set the shutter speed at 1/25th of a second so as to give the picture a longer exposure." You can readily see how valuable and important this information would be to help improve the quality of your pictures.

Let's try for a picture this week of Billie playing with his favorite toy—the one he always makes a rush for when he gets home from school. What is it—a sled, a scooter, an express wagon, or a bicycle? Has he a cowboy's suit? In any case, keep your camera loaded, watch for him at play and snap a picture of him that is characteristic of his playtime hours. Billie will grow up but not his pictures, and you will be glad some day to have him before your eyes, the little boy again at play, just as he was. Remember, the picture you want is his natural self. So don't let him pose or you will more likely get an attempted impersonation of a wooden soldier, not Billie. Remember that he should not be staring directly at the camera when you snap the shutter. Let him be intent on the thing he is doing, otherwise the picture may look as if you had just interrupted him with a scolding and ordered him to stop. Make two or three shots of him doing the particular thing you want the picture of, and try again, if necessary, until you get that quality of naturalness in pose and action that makes the true charm of children's pictures.

If you can't visualize a good story-telling picture, you will find innumerable ideas in magazines, especially those catering to the home or children. It would be quite unusual to thumb through the pages of one of these magazines without finding an advertisement or story from which you would get an idea you can apply to a snapshot in or around the home. Try it and don't forget to keep a record of the aperture you used and the shutter speed.

JOHN VAN GUILDER.

Still The Railway Age

People Appreciate Service When Snow Blocks Highways

What we are wondering now is what we would do without the railways. With our paved highways buried under feet of accumulating snow that no plow could keep clean; with transport trucks, buses and cars stalled and buried in snow all along the highways, how would we have moved and lived and had our being if it had not been for the railways?

The truth is that we are not quite so fast and so smart as we thought we were. We haven t got past the railway age yet, and as far as this county is concerned, we probably never will.—Huron, Ont., Expositor.

Those still on relief in the United States almost equal in numbers the total population of Canada.

Fur resources in the United States yield an annual income to trappers of $65,000,000.

Would Be Advantage

Light Colored Clothes For Children Might Help Prevent Accidents

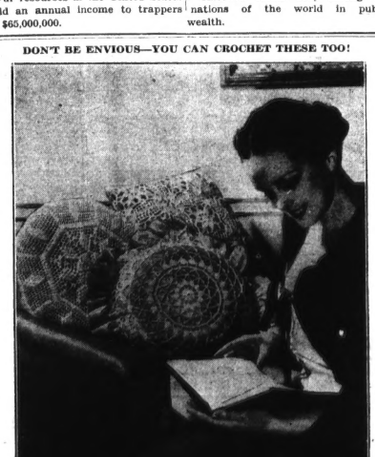

"Don't buy your children black raincoats, if you have any regard for their safety," said Dr. B. Corbett, commissioner of public safety at Milwaukee and chairman of the U.S. National Safety Commission, in his address to the Board of Trade at Sault Ste. Marie, Ont.

Even for adults, said Dr. Corbett, black raincoats were bad enough but on children they were particularly dangerous, for raincoats were ordinarily worn at times when visibility is poor and motorists do not get a proper chance to see children who might be on the highway.

"Buy your children raincoats of light colors," was his advice and he further suggested that light colored play clothes for children were also an advantage for the same reason.

America ranks 10th among the nations of the world in public wealth.

DON'T BE ENVIOUS—YOU CAN CROCHET THESE TOO!

Do you wish it were you—with these three lovely hand-crocheted pillows to your credit? Well, wish no more, my lady! The simple Alice Brooks patterns will show you how to make them easily—and how to use the same stunning designs for dressy doilies, scarfs, spreads. Is your crochet hook handy? Then all you need is the number of the patterns. The one in the corner that uses the popular popcorn stitch to form an eight-point star is Y5202. The lovely flowered-centred square—done in varied colors—that forms the second pillow is Y5509. The open work design in the third pillow—that looks so handsome over a colored lining—is Y5513. All patterns give complete, detailed directions; illustrate the pillows and doilies, and stitches used; and give material requirements. Send 20 for each pattern (60c for all three) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Early Canadian Currency Tells Story Of Pioneer Business And Finance

British Farmers Get Break

Tithes Levied Against Land For Centuries Now Abolished

To end the controversy which has vexed Britain for more than a century, the government announced legislation to abolish tithes paid by landowners to churches.

British farmers have revolted several times in the last few years against the payment of tithes, particularly in Norfolk, Suffolk and Kent counties, where farmers have been hard pressed since the depression.

Tithes have been levied against land in Britain since the seventh century and since 1704 they have been collected for the benefit of the Church of England, under an act of Queen Anne known as "Queen Anne's Bounty." The revenues, which originally amounted to about $100,000 a year, were intended for the benefit of poor curates. In recent years they have risen to a total of about $11,000,000 annually.

During 1934, when several serious protests occurred, British farmers followed the passive resistance tactics of Mahatma Gandhi by lying in the paths of trucks which officials sent to their farms to confiscate cattle and grain in payment of overdue tithes.

In a protest last spring a sign was chalked on the side of a church. "Churchmen, be sporty and pay for your own religion."

Plans for changing the tithes system, which has been a knotty problem for several centuries, were introduced in Parliament two years ago, but the issue was sidestepped because it cut across party lines. Last December a proporal was introduced for abolishing tithes. They date from pre-Biblical days when land owners were assessed their whole "first fruits" and thereafter one-tenth of each year's produce.

Prefers Commercial Life

Australian-Born Chinese Does Not Like Market Gardening

Melbourne, Australia, is contemplating a little sadly the vanishing of a familiar figure — the Chinese market gardener. In ten years the number who held stands at the Victoria market has decreased by 25 per cent., and before very long, so the experts say, there may be no more. The Chinese gardeners, once a familiar sight on every little plot of ground in the odd corners of the suburbs are the survivors of the great Chinese migration in the gold rush days. Once there were as many as 35,000 Chinese in Victoria, but restrictive legislation, the return to the homeland and death have reduced their numbers to-day to a couple of thousand.

Of the present gardeners, many have no families and the young Australian-born Chinese is no more anxious than his white fellow citizen to slave in a market garden from dawn to dusk. He prefers commerce.

Women Homesteaders

Total Of 490 Claims Registered Last Year In Alberta

Homesteaders are flocking into the Edmonton and northern districts indicating a definite back to the land movement according to the annual report of the provincial land department tabled in the legislature by Hon. C. C. Ross, minister of lands and mines.

For the calendar year of 1935 homestead entries were 1,636 and of this number 1,012 were registered at the Edmonton office. Women farmers or "farmerettes" are also coming into the picture more largely than hitherto, according to the report. No less than 490 of the total homestead entries during the year were registered by women.

Transfer Was Success

The successful transfer of a living heart from one fish's body into another was described at George Washington University by Professor George Ba n Jenkins. He told of keeping transplanted hearts living in embyros of sea minnows for from eight to 10 days. "The hearts slow down a little at first, but after an hour they usually resume their normal speed," he said.

Eye Specialists Were Right

In a scramble under the goal in a basketball game at Milwaukee, Wisconsin, Donald Kodrich was poked in the eye. Doctors at the county hospital examined it, shook their heads sadly, and told Donald he never would see with that eye again. "I haven't been able to see through it since I was six," said Donald.

Schultz—"Your opening sale has closed. What now?"

Schwartz — "Our closing sale opens."

Ice skating on a dance floor laid out like a multi-colored checker board is popular in Moscow, Russia, this winter.

Echoes of Canada's early days when a dollar was a "piastre" and "pieces of eight" were practical units of currency, reached Montreal a short time ago via the international banking route.

From a bank in the United States, The Royal Bank of Canada received for redemption a bundle of old bills issued by the Union Bank, Montreal, Lower Canada, and dated 1838. Thin, some of them slightly dog-eared, the printing faded, they must have lain in some bottom drawer or old chest for nearly 100 years. There were 83 individual bills in the bundle in denominations of $1, $2, $3, $5 and $10. Their total value was apparently $140.00.

The bills themselves tell a romantic story of Canadian pioneer business and finance. Engraved on the face of the "$10" is a representation of a railroad train, presumably the first railway in Canada, which began operations between Laprairie and St. Johns, Que., in 1836, two years before the bills were issued. By a coincidence, The Royal Bank of Canada this year has issued a calendar depicting the opening of this same railroad.

It is interesting to note, too, that the bills are printed in a polyglot of English, French and Spanish. The one dollar bill is engraved in French, English and a combination of French and Spanish, for the word "dollar" is translated on the opposite side into "une piastre." The use of the word "piastre" and its existence in financial parlance 100 years ago arose from the active trade which had grown up between Canada and the Caribbean.

Halifax and other Maritime merchants of 1838 were already familiar with this term through their dealings with many Spanish business men trading in the Maritime ports. Spanish currency was then common in Canada, particularly in the East and "piastres" were generally accepted as the equivalent of dollars. It is from this same term that our common expressions "two bits" and "four bits" originated; for the "piastre" was divided into eight equal parts, the "pieces of eight" of pirate fiction, each piece being a "bit"; thus "two bits" became a quarter or 25c, four bits, 50c, and so on.

Other details of the old bills bring to light other unusual facts concerning the trading and financial practices of the early days. At that time there was no legal currency in Canada. Groups of men organized themselves from time to time into local banks and issued bills to facilitate business dealings. Frequently the bills were issued payable to some stated individual, or "bearer". Thus, one of the $5 bills of the 1838 issue reads: "Union Bank pay on demand $5 to R. Harvey or bearer", Mr. Harvey's name being written in by the bank.

This story, unfortunately, has a sad ending, at least for the people who have presented these old bills for redemption. Little is known today of the Union Bank of Montreal, "The Union Bank of Lower Canada," however, did exist and later became the Union Bank of Canada, which was absorbed by The Royal Bank of Canada, and it is perhaps because of this circumstance and the confusion between the names of the two banks that these old bills have found their way to The Royal Bank of Montreal.

Saddest of all, the "Counterfeit Detector", used by bankers as a book of reference, states in cold, unsentimental language: "Union Bank of Montreal: bank unknown and notes worthless."

But in this the "Counterfeit Detector" is wrong. The bills are not worthless. People interested in old coins and bills value them at 10c each. Thus, by the passage of time, $140.00 becomes a mere $8.30.

Within Twenty Years

Film Director Sees Television Not Very Far Distant

Robert Edmond Jones, film director of Hollywood, predicts that within 20 years a combination of television and three-dimension photography will revolutionize not only entertainment, but commercial operations and scientific study as well.

Looking ahead to 1956 he said he saw—

Movie stars performing right in the living rooms of millions of homes;

Department stores featuring the equivalent of kinetoscope "peep" shows in lieu of mannequins, to exhibit new fashions shown thousands of miles away.

A Versatile Couple

Canada's new Governor-General and his wife may be safely classed as the most versatile couple to ever occupy Rideau Hall. His place in literature is prominently assured for all time and in Kingston, Ontario, a play from her pen, "The Vision at the Inn", was presented in connection with a drama festival.

Honor is a harder master than the law.

Too Many Weeds In Western Barley

Feed grades of western barley are considerably penalized in feeding value and in popularity with Eastern Canadian feeders because of the quantities of weed seeds and other extraneous material they contain, said Prof. E. W. Crampton, Professor of Animal Nutrition, Macdonald College, Que., in an address he gave at the recent meeting of the National Barley Committee. Weeds in grain, he stated, can be removed comparatively easily by modern machinery.

Until some marked improvement is brought about in feeding grades of barley by way of reduction in the amounts of adulterants it is questionable, said Prof. Crampton, if Western Canadian barley will be widely used in Eastern Canada.

Other representatives of the Eastern provinces who were at the meeting spoke critically concerning the large weed-seed content of barley grown in the Prairie Provinces.

J. E. McRostie, an official of one of the leading Canadian milling companies, which handles large quantities of feed for livestock, stated that a one-pound sample taken recently from a carload of No. 4 C.W. western barley shipped to Ontario contained more than 7000 weed seeds.

In the report of the Special Committee of the Dominion Department of Agriculture concerning the marketing of feed barley, W. R. White, Chief of the Feed Division, Dominion Seed Branch, stated that numerous criticisms, chiefly from those professionally engaged in promoting agriculture in Ontario, Quebec and the Maritime Provinces were voiced against the presence of fine weed seeds in Western feed grain. It was represented that such weed seeds created a menace, which to be overcome, necessitated either recleaning before grinding with a plate grinder or such complete pulverization as to be unduly costly as well as undesirable from a feed standpoint.

Lew Hutchison of Duhamel, Alta., a farmer and a member of the Alberta Wheat Pool, said it was evident from the criticisms of the too great prevalence of weed seeds in western barley that the solution lies in better farming and in cleaning grain on the farm.

In 1935, over 77 per cent of the total crop of barley produced in Canada was grown in the three Prairie Provinces.

IT TAKES quality to stay at the top year after year. For 30 years Kellogg's Corn Flakes have been champions. Today they outsell all other ready-to-eat cereals by millions of packages because they give most in value. Made and guaranteed by Kellogg in London, Ontario.

Nothing takes the place of Kellogg's CORN FLAKES

A Weekly Sermonette

YOUR GOD

God says: "Thou shalt have no other Gods before me. Who so loveth Father or Mother, Husband or Wife, Son or Daughter more than Me is not worthy of Me."

Dear Reader: Are you allowing anything to come between you and God? Does God have first place in your heart?—Sincerely, J. L. Davidson, The Welder, Calgary.
